Type: ROUTINE INSPECTION  
Date: May-11-2015

**3.54** (a)  
**FEEDING.**

In a rabbit room there was a small bag of hay that was open, and on a table with a bottle of disinfectant. The bottom side of the hay bag was wet, possibly with disinfectant.

Storing food in a manner where it could become contaminated could be harmful to the rabbits. All animal food should be stored and maintained in a manner that protects it from contamination and deterioration.

To be corrected from this time forward.

An exit interview was conducted with facility representatives.
