Law Enforcement Officer Deaths in 2018

**FIREARMS-RELATED DEATHS INCREASE 13 PERCENT
OVER SAME PERIOD LAST YEAR**

A

ccording to preliminary data compiled by the National Law Enforcement Officers

Memorial Fund, as of December 27, 2018, 144 federal, state, and local law enforcement officers have died in the line of duty this year, increasing 12 percent over the 129 officers killed in 2017.

Firearms-related fatalities were the leading cause of officer deaths, with 52 officers shot and killed in 2018. This represents 13 percent increase from the 46 officers killed in firearms-related incidents in 2017.

Fifty officers were killed in traffic-related incidents this year, increasing nine

percent, compared to 46 traffic-related deaths last year. Thirty-two officers were killed in vehicle crashes in 2018. Of those, 16 officers were killed in single-vehicle crashes, a 14 percent increase from 2017. Fourteen officers were killed when they were struck while outside of their vehicles and four officers were killed in motorcycle crashes.

Forty-two officers died due to other causes this year, 18 of which were job-related illnesses where officers collapsed or suffered a cardiac event. Fifteen officers died because of an illness contracted during the 9/11-related rescue and recovery efforts, four officers drowned, three officers were beaten to death.

Total Fatalities 1968-2018

© NLEOMF

Texas, Florida, California, and New York experienced the largest number of officer fatalities in 2018, with 11 each. North Carolina had eight deaths followed by South Carolina, Georgia,

and Indiana with five. Two territorial officers and nine federal officers also died in 2018. Fourteen states and the District of Columbia did not lose an officer in 2018.

134 were male and ten were female. Their average age was 41 years, with 12 years of service. On average, each officer left behind two children.

52

Firearms-Related Fatalities

Firearms-related fatalities increased in 2018 with 52 officers shot and killed, compared to 46 in 2017, a 13 percent increase. Of the 52 firearms-related deaths, 14 occurred while officers were attempting to place an individual under arrest. Eight officers were killed while conducting investigative activity. Six officers were killed responding to domestic disturbance and public disturbance calls, each totaling 12. Five officers were ambushed in 2018, a 50 percent decrease over 2017. Four officers were shot and killed conducting traffic stops. Two officers were killed while serving warrants, two officers were killed while handling/transporting prisoners, and two were inadvertently shot by other law enforcement personnel. One officer was killed while responding to a burglary, one was killed during a tactical situation, and one was killed while responding to a call for an armed suicidal subject.

Handguns were the leading type of firearm used against law enforcement in 2018. Of the 52 officer fatalities, 31 officers were shot and killed with a handgun, four of those officers were

disarmed and shot with their own duty weapon. Ten officers were shot and killed with a rifle, two officers were shot and killed with a shotgun, and the firearm used in five officer fatalities remains unknown.
