		LAINT - NO:	-cv 600 Pennsylvania Aver Washington, D	ue, NW

1	Plaintiffs Federal Trade Commission ("FTC") and the states of New York, Connecticut,		
2	Pennsylvania, Delaware, Maine, Maryland, Massachusetts, Michigan, Minnesota, Nevada, New		
3	Hampshire, New Jersey, New Mexico, Oklahoma, Oregon, Rhode Island, and Wisconsin, by and		
4	through their respective Attorneys General (together, the "State Plaintiffs," and collectively with		
5	the FTC, "Plaintiffs"), petition this Court pursuant to Section 13(b) of the Federal Trade		
6	Commission Act ("FTC Act"), 15 U.S.C. § 53(b); 15 U.S.C. § 26; and applicable state laws for		
7	equitable relief against Defendant Amazon.com, Inc. ("Amazon") to undo and prevent its unfair		
8	methods of competition in violation of Section 5(a) of the FTC Act, 15 U.S.C. § 45(a); Section 2		
9	of the Sherman Act, 15 U.S.C. § 2; and state competition and consumer protection laws.		
10	I. NATURE OF THE CASE		
11	1. The early days of online trade were bursting with possibility. Competition		
12	flourished. A newly connected nation saw a wide-open frontier where anyone with a good idea		
13	would have a fair shot at success.		
<b>1</b> 4	2. Today, however, this wide-open frontier has been enclosed. A single company,		
15	Amazon, has seized control over much of the online retail economy.		
16	3. Amazon is a monopolist. It exploits its monopolies in ways that enrich Amazon		
17	but harm its customers: both the tens of millions of American households who regularly shop on		
18	Amazon's online superstore and the hundreds of thousands of businesses who rely on Amazon to		
19	reach them.		
20	4. For example, Amazon has hiked so steeply the fees it charges sellers that it now		
21	reportedly takes close to half of every dollar from the typical seller that uses Amazon's		
22	fulfillment service. Amazon recognizes that sellers find "that it has become more difficult over		
23	time to be profitable on Amazon" due to Amazon's But as one seller		
24	explains, "we have nowhere else to go and Amazon knows it." Amazon has also		
	COMPLAINT - 1       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222		

Case 2:23-cv-01495	Document 1	Filed 09/26/23	Page 6 of 172

1	through a poperation called "Project Nessie."
2	Amazon's Project Nessie has already
3	extracted over from American households.
4	5. In addition to overcharging its customers, Amazon is degrading the services it
5	provides them. Amazon's online storefront once prioritized relevant, organic search results.
6	Amazon shifted gears so that it
7	now litters its storefront with pay-to-play advertisements. Amazon executives internally
8	acknowledge this creates
9	This practice, too, harms
10	both sellers and shoppers alike. Most sellers must now pay for advertising to reach Amazon's
11	massive base of online shoppers, while shoppers consequently face less relevant search results
12	and are steered toward more expensive products. Notably, Amazon has increased not only the
13	number of advertisements it shows, but also
14	because Amazon can
15	extract billions of dollars through increased advertising despite worsening its services for
16	customers.
17	6. In a competitive world, Amazon's decision to raise prices and degrade services
18	would create an opening for rivals and potential rivals to attract business, gain momentum, and
19	grow. But Amazon has engaged in an unlawful monopolistic strategy to close off that
20	possibility.
21	7. This case is about the illegal course of exclusionary conduct Amazon deploys to
22	block competition, stunt rivals' growth, and cement its dominance. The elements of this strategy
23	are mutually reinforcing. Amazon uses a set of anti-discounting tactics to prevent rivals from
24	growing by offering lower prices, and it uses coercive tactics involving its order fulfillment
	COMPLAINT - 2 CASE NO:cv

service to prevent rivals from gaining the scale they need to meaningfully compete. Amazon
 deploys this interconnected strategy to block off every major avenue of competition—including
 price, product selection, quality, and innovation—in the relevant markets for online superstores
 and online marketplace services.

8. Amazon's course of conduct has unlawfully entrenched its monopoly position in
both relevant markets. According to an industry source, Amazon now captures more sales than
the next fifteen largest U.S. online retail firms combined. Yet Amazon has violated the law not
by being big, but by how it uses its scale and scope to stifle competition.

9 9. A critical mass of customers is key to powering what Amazon calls its
10 "flywheel." By providing sellers access to significant shopper traffic, Amazon is able to attract
11 more sellers onto its platform. Those sellers' selection and variety of products, in turn, attract
12 additional shoppers. More shoppers yield more customer-generated product ratings, reviews,
13 and valuable consumer data for Amazon to use. All of this enables Amazon to benefit from the
14 accelerated growth and momentum that network effects and scale economies can fuel.

15 10. The biggest threat to Amazon's monopoly power would be for a rival to attract its 16 own critical mass of dedicated customers. Competitors able to build a sizable base of either 17 shoppers or sellers could spin up their own "flywheels," overcome barriers to entry and expansion, and achieve the scale needed to compete effectively in the relevant markets. As Mr. 18 19 Bezos once wrote, "[o]nline selling (relative to traditional retailing) is a scale business 20 characterized by high fixed costs and relatively low variable costs. This makes it difficult to be a 21 medium-sized e-commerce company," and it is "difficult . . . for single-category e-commerce 22 companies to achieve the scale necessary to succeed." In order to "build an important and 23 lasting company . . . online in e-commerce," Mr. Bezos explained, "you have to have a scale 24 business," because "[t]his kind of business isn't going to work in small volumes." **COMPLAINT - 3** FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_

1 11. Having gained its own critical mass of both shoppers and sellers, Amazon set out
 2 to deny both current and would-be rivals the ability to do the same.

12. Amazon uses its vast power, size, and control over multiple business units to
implement an interrelated and exclusionary course of conduct. Each element of this overarching
strategy aims at the same goal: to keep rivals from gaining the scale needed to compete
effectively against Amazon. And each element amplifies the force of the rest, in a selfreinforcing cycle of dominance and harm.

8 13. One set of tactics stifles the ability of rivals to attract shoppers by offering lower
9 prices. Amazon deploys a sophisticated surveillance network of web crawlers that constantly
10 monitor the internet, searching for discounts that might threaten Amazon's empire. When
11 Amazon detects elsewhere online a product that is cheaper than a seller's offer for the same
12 product on Amazon, Amazon punishes that seller. It does so to prevent rivals from gaining
13 business by offering shoppers or sellers lower prices.

14 14. Originally, Amazon imposed explicit contractual requirements barring all sellers
15 from offering their goods for lower prices anywhere else. After European regulators began
16 investigating, Amazon got rid of these requirements in Europe. After a U.S. senator called for
17 antitrust scrutiny, Amazon did the same in the United States in 2019.

18 15. Amazon recognized that dropping an explicit contractual requirement while
19 continuing to use other anti-discounting tactics would appear "not only trivial but a trick and an
20 attempt to garner goodwill with policymakers amid increasing competition concerns."

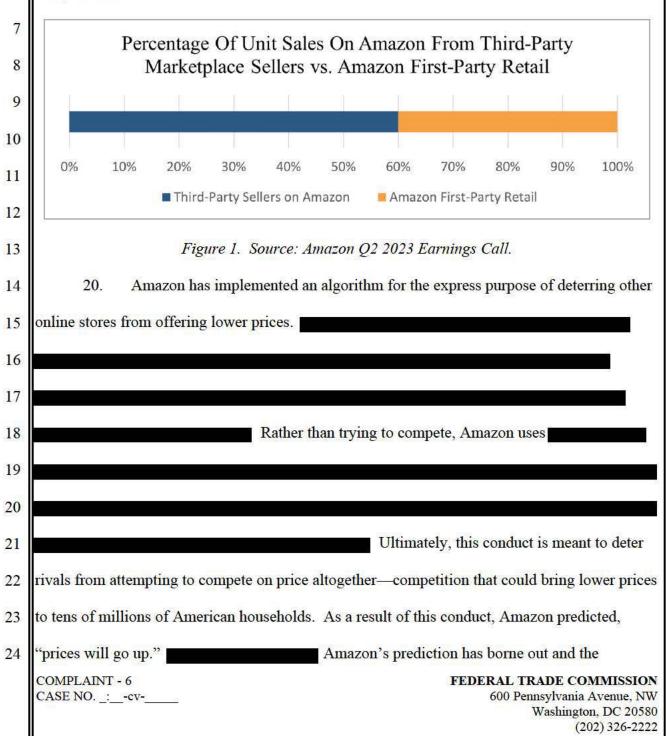

## Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 9 of 172

Amazon-selected offer for a product. Nearly % of Amazon sales are made through the Buy 1 Box and, as Amazon internally recognizes, eliminating a seller from the Buy Box causes that 2 seller's sales to "tank." Another form of punishment is to bury discounting sellers so far down in 3 Amazon's search results that they become effectively invisible. Still another is 4 5 For especially important sellers, Amazon keeps in place a targeted version of the contractual 6 requirement it supposedly stopped using in 2019. If caught offering lower prices elsewhere 7 8 online, these sellers face the ultimate threat: not just banishment from the Buy Box, but total 9 exile from Amazon's Marketplace. As Amazon internally admits, these tactics have a and many sellers "live in constant fear" of them. 10 11 17. Moreover, Amazon's one-two punch of seller punishments and high seller fees often forces sellers to use their inflated Amazon prices as a price floor everywhere else. As a 12 13 result, Amazon's conduct causes online shoppers to face artificially higher prices even when shopping somewhere other than Amazon. Amazon's punitive regime distorts basic market 14 signals: one of the ways sellers respond to Amazon's fee hikes is by increasing their own prices 15 off Amazon. An executive from another online retailer sums up this perverse dynamic: 16 Amazon's anti-discounting conduct 17 18 Amazon's illegal tactics mean that when Amazon raises its 19 fees, others-competitors, sellers, and shoppers-suffer the harms. 20 18. Amazon's tactics suppress rival online superstores' ability to compete for 21 shoppers by offering lower prices, thereby depriving American households of more affordable 22 options. Amazon's conduct also suppresses rival online marketplace service providers' ability to 23 compete for sellers by offering lower fees because sellers cannot pass along those savings to 24 shoppers in the form of lower product prices. COMPLAINT - 5 FEDERAL TRADE COMMISSION CASE NO. : -cv-600 Pennsylvania Avenue, NW

Washington, DC 20580 (202) 326-2222

## Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 10 of 172

1 19. These various anti-discounting tactics constrain sellers operating on Amazon's
 2 third-party business unit, through which sellers set their own product prices. But Amazon also
 3 operates an enormous first-party arm, which accounted for 40% of its overall unit sales in the
 4 second quarter of 2023, as shown in Figure 1. Using its direct control over these prices, Amazon
 5 created another anti-discounting tool to weaponize its first-party arm in its campaign against
 6 competition.

algorithm has worked just as envisioned: suppressing price competition by disciplining rival
 retailers who dare to discount.

3	21. Amazon's various anti-discounting tactics upend the normal give-and-take
4	process of competition. Even rivals that offer lower-cost marketplace services struggle to attract
5	sellers and watch as sellers hike prices on their storefronts due to fear of Amazon's penalties.
6	Many sellers raise their prices off Amazon to avoid punishment. Others never try discounting in
7	the first place; fear of retribution by Amazon drives them to preemptively set higher prices
8	everywhere. Still others simply stop—or never start—selling anywhere other than Amazon to
9	avoid any possibility of Amazon's sanctions.
10	22. By taming price cutters into price followers, Amazon freezes price competition
11	and deprives American shoppers of lower prices.
12	23. Alongside these anti-discounting tactics, Amazon also goes a step further and
13	Amazon created a algorithm internally codenamed
<u>14</u>	"Project Nessie"
15	
16	Amazon has deemed Project
17	Nessie in excess profit for
18	Amazon.
19	
20	24. Amazon deploys yet another tactic as part of its monopolistic course of conduct.
21	Amazon conditions sellers' ability to be "Prime eligible" on their use of Amazon's order
22	fulfillment service. As with Amazon's anti-discounting tactics, this coercive conduct forecloses
23	Amazon's rivals from drawing a critical mass of sellers or shoppers—thereby depriving them of
24	the scale needed to compete effectively online.
	COMPLAINT - 7 CASE NO:cv 600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222

25. Amazon makes Prime eligibility critical for sellers to fully reach Amazon's
 enormous base of shoppers. In 2021, more than % of all units sold on Amazon in the United
 States were Prime eligible.

Prime eligibility is critical for sellers in part because of the enormous reach of
Amazon's Prime subscription program. According to public reports, Mr. Bezos told Amazon
executives that Prime was created in 2005 to "draw a moat around [Amazon's] best customers."
Prime now blankets more than <sup>6</sup>% of all U.S. households, with its reach extending as far as
% in some zip codes.

9 27. Amazon requires sellers who want their products to be Prime eligible to use
10 Amazon's fulfillment service, Fulfillment by Amazon ("FBA"), even though many sellers would
11 rather use an alternative fulfillment method to store and package customer orders.

12 28. Many sellers would also prefer to "multihome," simultaneously offering their 13 goods across multiple online sales channels. Multihoming can be an especially critical 14 mechanism of competition in online markets, enabling rivals to overcome the barriers to entry 15 and expansion that scale economies and network effects can create. Multihoming is one way that 16 sellers can reduce their dependence on a single sales channel.

Sellers could multihome more cheaply and easily by using an independent
fulfillment provider—a provider not tied to any one marketplace—to fulfill orders across
multiple marketplaces. Permitting independent fulfillment providers to compete for any order—
on or off Amazon—would enable them to gain scale and lower their costs to sellers. That, in
turn, would make independent providers even more attractive to sellers seeking a single,
universal provider. All of this would make it easier for sellers to offer items across a variety of
outlets, fostering competition and reducing sellers' dependence on Amazon.

24

COMPLAINT - 8 CASE NO. \_:\_\_-cv-\_\_\_\_

1	30. But by coercively conditioning access to an enormous base of shoppers on sellers'
2	use of FBA, Amazon forecloses that world.
3	31. Amazon caught a glimpse of this alternative universe when it temporarily relaxed
4	its coercive conduct. As Amazon recognized, this decision was immediately popular with both
5	shoppers and sellers. But internally,
6	that would threaten Amazon's monopoly power. An
7	Amazon executive explained
8	
9	
10	
11	32. To combat this competitive threat, Amazon resumed its coercive fulfillment
12	conduct: today, virtually all sellers must use Amazon's proprietary FBA service to fully reach
13	Amazon's enormous base of U.S. shoppers.
14	33. Each element of Amazon's monopolistic strategy works to keep its rivals and
15	potential rivals from growing, gaining momentum, and achieving the scale necessary to
16	meaningfully compete against Amazon. The cumulative impact of Amazon's unlawful conduct
17	is greater than the harm caused by any particular element. Each aspect of Amazon's strategy
18	amplifies the exclusionary effects of the others, further insulating Amazon from meaningful
19	competition and further widening the gulf between Amazon and everyone else.
20	34. Together, this self-reinforcing course of conduct blocks every important avenue
21	of competition. With its monopoly power cemented, Amazon is now extracting monopoly
22	profits without denting—and instead while growing—its monopoly power. Amazon has
23	consistently hiked the prices it charges sellers, as shown in Figure 2.
24	
	COMPLAINT - 9       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW

Washington, DC 20580 (202) 326-2222

1 2 3 4 5 6 7 8 9 10 Figure 2. Source: Amazon Internal Documents. 11 35. Amazon's price hikes in the form of pay-to-play advertisements have been enormously lucrative, leading its revenues from U.S. ad sales to skyrocket from 12 in 13 2015 to in 2021. Amazon took in in revenue from U.S. Marketplace 14 seller fees in 2021 alone. Strikingly, these seller fees now account for over % of Amazon's 15 total profits. Sellers pay. Shoppers get lower-quality search results for higher-priced products. 16 Only Amazon wins. 17 36. In a market free from anticompetitive restraints, Amazon's choice to exploit its 18 monopoly power would create openings for rivals to enter, grow, and meaningfully compete. 19 Rival online marketplaces could draw sellers by offering them lower fees or better terms, and 20 sellers could pass along those lower costs to American shoppers in the form of lower prices. 21 Rival online superstores, meanwhile, could draw shoppers by offering better prices, greater 22 selection, or a superior shopping experience. But Amazon's illegal course of conduct shields 23 Amazon from the competitive checks it would face in a free enterprise system. 24 COMPLAINT - 10 FEDERAL TRADE COMMISSION CASE NO. : -cv-

37. Amazon's illegal monopolistic strategy is paying off for Amazon, but at great cost 1 to tens of millions of American households and hundreds of thousands of sellers. 2 38. Left unchecked, Amazon will continue its illegal course of conduct to maintain its 3 monopoly power. That conduct will include—but will not necessarily be limited to-the 4 5 schemes it uses today. As Mr. Bezos has said, "on matters of vision we are stubborn and relentless," but "[o]n the details, we at Amazon are always flexible." 6 39 7 Plaintiffs bring this lawsuit despite Amazon's extensive efforts to impede the 8 government's investigation and hide information about its internal operations. Amazon 9 executives systematically and intentionally of the Signal messaging app. Amazon prejudicially 10 11 despite Plaintiffs' instructing Amazon not to do so. 12 13 40. Plaintiffs now ask this Court to put an end to Amazon's illegal course of conduct, pry loose Amazon's monopolistic control, deny Amazon the fruits of its unlawful practices, and 14 restore the lost promise of competition. 15 JURISDICTION AND VENUE 16 Π. This Court has subject matter jurisdiction over this action pursuant to Section 5(a) 41. 17 of the FTC Act, 15 U.S.C. § 45(a), 15 U.S.C. § 26, 28 U.S.C. §§ 1331, 1337(a), and 1345, and 18 supplemental jurisdiction pursuant to 28 U.S.C. § 1367(a). This Court's exercise of 19 supplemental jurisdiction over State Plaintiffs' state law claims will avoid unnecessary 20 duplication and multiplicity of actions and will promote the interests of judicial economy, 21 convenience, and fairness. 22 This Court has personal jurisdiction over Amazon because Amazon has the 42. 23 requisite constitutional contacts with the United States of America pursuant to 15 U.S.C. § 53(b). 24 COMPLAINT - 11 FEDERAL TRADE COMMISSION CASE NO. : -cv-600 Pennsylvania Avenue, NW Washington, DC 20580

(202) 326-2222

#### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 16 of 172

This Court also has personal jurisdiction over Amazon because it maintains its corporate
 headquarters in Washington, does business in Washington, and has engaged in the illegal
 conduct alleged herein in Washington, including by making corporate decisions challenged in
 this matter from its corporate headquarters in Washington.

43. Amazon's general business practices, and the unfair methods of competition
alleged herein, are activities "in or affecting commerce" within the meaning of Section 5 of the
FTC Act, 15 U.S.C. § 45.

8 44. Amazon is, and at all relevant times has been, a corporation, as the term
9 "corporation" is defined in Section 4 of the FTC Act, 15 U.S.C. § 44.

45. Venue in this district is proper under 15 U.S.C. § 22, 28 U.S.C. § 1391(b), (c),
and (d), and 15 U.S.C. § 53(b). Amazon is found, resides, transacts business, and has agents in
this state and district, and a portion of the affected commerce described herein has been carried
out in this state and district.

#### 14 **III. THE PARTIES**

46. Plaintiff FTC is an administrative agency of the United States Government 15 established, organized, and existing pursuant to the FTC Act, 15 U.S.C. § 41, et seq., with its 16 principal offices in the District of Columbia. The FTC is vested with authority and responsibility 17 for enforcing, among other laws, Section 5 of the FTC Act, 15 U.S.C. § 45, and is authorized 18 under Section 13(b) of the FTC Act, 15 U.S.C. § 53(b), to initiate court proceedings to enjoin 19 violations of any law the FTC enforces. This case is proper under Section 13(b) of the FTC Act, 2015 U.S.C. § 53(b), because the FTC has reason to believe that Amazon is violating, or is about to 21 violate, Section 5 of the FTC Act, making it appropriate, efficient, and suitable to file this action 22 in federal court with State Plaintiffs to seek the requested relief. 23

24

COMPLAINT - 12 CASE NO. \_:\_\_-cv-\_\_\_\_

47. Plaintiff State of New York is a sovereign state. The Attorney General of the
 State of New York is the chief legal officer for the state and brings this action on behalf of the
 people of the State of New York to protect the state, its general economy, and its residents from
 Amazon's unlawful business practices. The Attorney General has the authority under federal
 and state law, including Section 16 of the Clayton Act and New York Executive Law § 63(12),
 to pursue injunctive and other equitable relief to prevent and remedy the harms caused by
 anticompetitive conduct.

Plaintiff State of Connecticut is a sovereign state. The Attorney General of the 8 48. 9 State of Connecticut is the chief legal officer for the state and brings this action on behalf of the people of the State of Connecticut to protect the state, its general economy, and its residents from 10 11 Amazon's unlawful business practices. The Attorney General has the authority under federal and state law, including Section 16 of the Clayton Act and the Connecticut Antitrust Act, Conn. 12 Gen. Stat. § 35-24 et seq., and the Attorney General, acting at the request of the Commissioner of 13 Consumer Protection, has the authority under the Connecticut Unfair Trade Practices Act, Conn. 14 15 Gen. Stat. § 42-110b et seq., to pursue injunctive and other equitable relief to prevent and 16 remedy the harms caused by anticompetitive conduct.

49. Plaintiff Commonwealth of Pennsylvania is a sovereign commonwealth state.
The Attorney General of the Commonwealth of Pennsylvania is the chief legal officer for the
state and brings this action in the name and on behalf of the people of the Commonwealth of
Pennsylvania to protect the Commonwealth, its general economy, its residents, and consumers
from Amazon's unlawful business practices. The Attorney General has authority under state and
federal law, including Section 16 of the Clayton Act, the Pennsylvania Unfair Trade Practices
and Consumer Protection Law, 73 P.S. §§ 201-4 and 201-4.1, and the Commonwealth Attorneys

24

COMPLAINT - 13 CASE NO. \_:\_\_-cv-\_\_\_\_

Act, 71 P.S. § 732-204(c), to pursue injunctive and other equitable relief to prevent and remedy
 the harms caused by anticompetitive conduct and unfair and deceptive acts and practices.

50. Plaintiff State of Delaware is a sovereign state. The Attorney General of the State
of Delaware is the chief legal officer for the state and brings this action in the name and on
behalf of the people of the State of Delaware to protect the state, its general economy, and its
residents from Amazon's unlawful business practices. The Attorney General has authority under
federal and state law, including Section 16 of the Clayton Act and Del. Code Ann. Tit. 6, § 2105,
to pursue injunctive and other equitable relief to prevent and remedy the harms caused by
anticompetitive conduct.

51. Plaintiff State of Maine is a sovereign state. The Attorney General of the State of
Maine is the chief legal officer for the state and brings this action in the name and on behalf of
the people of the State of Maine to protect the state, its general economy, and its residents from
Amazon's unlawful business practices. The Attorney General has authority under state and
federal law, including Section 16 of the Clayton Act and the Maine Monopolies and Profiteering
Law, 10 M.R.S.A. § 1104, to pursue injunctive and other equitable relief to prevent and remedy
the harms caused by anticompetitive conduct.

52. Plaintiff State of Maryland is a sovereign state. The Attorney General of the State
of Maryland is the chief legal officer for the state and brings this action in the name and on
behalf of the people of the State of Maryland to protect the state, its general economy, and its
residents from Amazon's unlawful business practices. The Attorney General has authority under
state and federal law, including Section 16 of the Clayton Act and Maryland Commercial Code
Ann. § 11-201 *et seq.*, to pursue injunctive and other equitable relief to prevent and remedy the
harms caused by anticompetitive conduct.

COMPLAINT - 14 CASE NO. \_:\_\_-cv-\_\_\_

#### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 19 of 172

53. Plaintiff Commonwealth of Massachusetts is a sovereign state. The Attorney
 General of the Commonwealth of Massachusetts is the chief legal officer for the state and brings
 this action on behalf of the people of the Commonwealth of Massachusetts to protect the state, its
 general economy, and its residents from Amazon's unlawful business practices. The Attorney
 General has the authority under federal law, including Section 16 of the Clayton Act, to pursue
 injunctive and other equitable relief to prevent and remedy the harms caused by anticompetitive
 conduct.

54. Plaintiff State of Michigan is a sovereign state. The Attorney General of the State
of Michigan is the chief legal officer for the state and brings this action on behalf of the people
of the State of Michigan to protect the state, its general economy, and its residents from
Defendants' unlawful business practices. The Attorney General has the authority under federal
and state law, including Section 16 of the Clayton Act and the Michigan Antitrust Reform Act,
MCL 445.771 *et seq.*, to pursue injunctive and other equitable relief to prevent and remedy the
harms caused by anticompetitive conduct.

55. Plaintiff State of Minnesota is a sovereign state. The Attorney General of the
State of Minnesota is the chief legal officer for the state and brings this action on behalf of the
people of the State of Minnesota to protect the state, its general economy, and its residents from
Amazon's unlawful business practices. The Attorney General has the authority under federal
and state law, including Section 16 of the Clayton Act and Minnesota Statute 8.31, to pursue
injunctive and other equitable relief to prevent and remedy the harms caused by anticompetitive
conduct.

22 56. Plaintiff State of Nevada is a sovereign state. The Attorney General of the State
 23 of Nevada is the chief legal officer for the state, and the Consumer Advocate is vested with the
 24 authority to enforce Nevada's antitrust laws. The Attorney General, by and through the
 24 COMPLAINT - 15 FEDERAL TRADE COMMISSION
 25 CASE NO. \_:\_ -cv-\_\_\_\_
 26 COMPLAINT - 15 FEDERAL TRADE COMMISSION
 27 CASE NO. \_:\_ -cv-\_\_\_\_

Consumer Advocate, brings this action on behalf of the people of the State of Nevada to protect
 the state, its general economy, and its residents from Amazon's unlawful business practices. The
 Nevada Attorney General and the Consumer Advocate have the authority under federal and state
 law, including Section 16 of the Clayton Act, and Nev. Rev. Stat. §§ 228.380 and 598A.160, to
 pursue injunctive and other equitable relief to prevent and remedy the harms caused by
 anticompetitive conduct.

7 57. Plaintiff State of New Hampshire is a sovereign state, acting through the Office of 8 the Attorney General, Consumer Protection and Antitrust Bureau to enforce state and federal 9 laws designed to protect free and open markets for the benefit of consumers. The Attorney General brings this action on behalf of the State of New Hampshire to protect the state, its 10 general economy, and its consumers from Amazon's unlawful business practices. The Attorney 11 General has the authority under state and federal law, including Section 16 of the Clayton Act 12 13 and New Hampshire Combinations and Monopolies Act, N.H. Rev. Stat. Ann. ch. 356 et seq., to pursue injunctive and other equitable relief to prevent and remedy the harms caused by the 14 anticompetitive conduct. 15

16 58. Plaintiff State of New Jersey is a sovereign state. The Attorney General of the 17 State of New Jersey is the chief legal officer for the state and brings this action in the name and on behalf of the people of the State of New Jersey to protect the state, its general economy, and 18 19 its residents from Amazon's unlawful business practices. The Attorney General has authority 20under state and federal law, including Section 16 of the Clayton Act, the New Jersey Antitrust 21 Act, New Jersey Statutes Annotated ("N.J.S.A.") § 56:9-1 to -19 ("NJ ATA"), and the New 22 Jersey Consumer Fraud Act, N.J.S.A. § 56:8-1 to -227 ("NJ CFA"), to pursue injunctive and 23 other equitable relief to prevent and remedy the harms caused by anticompetitive conduct and 24 unfair and deceptive acts and practices. The Director of the New Jersey Division of Consumer **COMPLAINT - 16** FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_ 600 Pennsylvania Avenue, NW Affairs is charged with the responsibility of administering the NJ CFA on behalf of the Attorney
 General. N.J.S.A. 52:17B-120; N.J.S.A. 52:17B-124. The Attorney General brings this action
 for relief pursuant to his authority under the NJ ATA, specifically N.J.S.A. 56:9-6, 56:9-10(a),
 56:9-12(b) and the NJ CFA, specifically N.J.S.A. 56:8-8, 56:8-11, and 56:8-19.

5 59. Plaintiff State of New Mexico is a sovereign state. The Attorney General of the 6 State of New Mexico is the chief legal officer for the state and brings this action on behalf of the 7 people of the State of New Mexico to protect the state, its general economy, and its residents 8 from Amazon's unlawful business practices. The Attorney General has the authority under 9 federal and state law, including Section 16 of the Clayton Act and Section 10 of the New Mexico 10 Antitrust Act, to pursue injunctive and other equitable relief to prevent and remedy the harms 11 caused by anticompetitive conduct.

60. Plaintiff State of Oklahoma is a sovereign state. The Attorney General of the
State of Oklahoma is the chief legal officer of the state and brings this action in the name and on
behalf of the people of the State of Oklahoma to protect the state, its general economy, and its
residents from Amazon's unlawful business practices. The Attorney General has authority under
state and federal law, including Section 16 of the Clayton Act and the Oklahoma Antitrust
Reform Act, 15 79 O.S. §§ 201, *et seq.*, to pursue injunctive and other equitable relief to prevent
and remedy the harms caused by anticompetitive conduct.

19 61. Plaintiff State of Oregon is a sovereign state. The Attorney General of the State
20 of Oregon is the chief legal officer for the state and brings this action on behalf of the people of
21 the State of Oregon to protect the state, its general economy, and its residents from Amazon's
22 unlawful business practices. The Attorney General has the authority under federal and state law
23 including Section 16 of the Clayton Act and the Oregon Antitrust Law, Oregon Revised Statutes

24

COMPLAINT - 17 CASE NO. \_:\_\_-cv-\_\_\_\_

("ORS") 646.705 to ORS 646.836, to pursue injunctive and other equitable relief to prevent and 1 remedy the harms caused by anticompetitive conduct. 2

62. 3 Plaintiff State of Rhode Island is a sovereign state. The Attorney General of the State of Rhode Island is the chief legal officer for Rhode Island and brings this action on behalf 4 5 of the people of the State of Rhode Island to protect Rhode Islanders from Amazon's unlawful business practices. The Attorney General has the authority under federal and state law, including 6 Section 16 of the Clayton Act and Rhode Island General Laws § 6-13.1-1 et seq., to pursue all 7 8 available types of relief to prevent and remedy the harms caused by anticompetitive conduct. 63. 9 Plaintiff State of Wisconsin is a sovereign state. The Attorney General of the

State of Wisconsin is the chief legal officer for the state and brings this action on behalf of the 10 people of the State of Wisconsin to protect the state, its general economy, and its residents from 11 Amazon's unlawful business practices. The Attorney General has the authority under federal 12 and state law, including Section 16 of the Clayton Act and Wis. Stat. § 133.03, to pursue 13 injunctive and other equitable relief to prevent and remedy the harms caused by anticompetitive 14 15 conduct.

16 64. Defendant Amazon is a multinational online retail and technology company that conducts business throughout the United States. Amazon is headquartered in Seattle, 17 18 Washington, with its principal place of business at 410 Terry Avenue North, Seattle, Washington 19 98109, and is organized and existing under the laws of Delaware. Unless otherwise specified, 20"Amazon" refers to Amazon.com, Inc., and all corporate predecessors, subsidiaries, successors, and affiliates. 21

22

#### IV. **AMAZON'S OPERATIONS**

65. Amazon is one of the largest companies in the world, ranked among the five 23 largest publicly traded companies by both market capitalization and revenue. Amazon's 24**COMPLAINT - 18** FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_

business spans vast portions of the American economy, extending from its core of online retail
 into media, cloud computing, brick-and-mortar grocery stores, an array of logistics and
 operational services, and more. It has expanded in part through an acquisition spree, buying up
 more than 100 companies in sectors spanning entertainment, grocery, and healthcare. Its reach
 ranges from selling socks and making movies to running a pharmacy and operating datacenters
 that house exabytes of data.

7 66. The key aspects of Amazon's operations relevant to this Complaint are its:
8 (1) first-party Retail and third-party Marketplace business units; (2) public-facing online
9 superstore; (3) advertising services; (4) Prime subscription program; and (5) fulfillment service.

10

11

12

13

A. Amazon's First-Party Retail And Third-Party Marketplace Business Units
 67. Amazon began as an online bookstore in 1994 and rapidly expanded into new
 product categories: first DVDs and CDs, then electronics and toys, and then nearly everything.
 In 2020, Amazon sold almost unique products across virtually every conceivable

14 category to U.S. consumers.

68. Amazon originally sold goods to shoppers by purchasing items wholesale and
reselling them on its website. Amazon calls its wholesale suppliers "vendors." Today, Amazon
continues to sell a wide range of products through this type of vendor-retailer relationship, from
laundry detergent to sports equipment.

69. Amazon also sells its own private label goods. These range from devices like
Amazon's Kindle e-reader or Ring doorbell, to consumer products like batteries sold under the
"Amazon Basics" label, to products without any clear Amazon affiliation, such as dietary
supplements sold under the "Revly" label.

70. These two components, vendor-retailer and private label, make up Amazon's
first-party retail business unit, which Amazon refers to collectively as Amazon "Retail."

COMPLAINT - 19 CASE NO. \_:\_\_-cv-\_\_\_\_

#### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 24 of 172

1 71. Amazon also runs what it calls its "Marketplace," where other companies can sell 2 products directly to shoppers through its online store. Amazon calls third-party companies that 3 sell on Amazon "sellers," and refers to sales by sellers as "Marketplace" sales.

72. Amazon charges sellers four primary fees to sell on its Marketplace. First, 4 5 Amazon requires sellers to pay a selling fee, which can be a monthly fee or a fee for each item sold. Second, Amazon charges all sellers a commission or "referral fee" based on the price of 6 each item sold on Amazon. Third, Amazon charges sellers for the use of Amazon's fulfillment 7 8 and delivery services. Fourth, Amazon charges sellers for advertising services. While Amazon 9 also charges sellers other fees, these four types constitute over 5% of the revenue Amazon takes in from sellers. As a practical matter, most sellers must pay these four fees to make a significant 10 11 volume of sales on Amazon.

12 73. Amazon estimated that in 2022, it would take % of all sales revenue earned
13 by sellers who use its fulfillment service.

The Marketplace accelerated Amazon's growth by allowing it to exponentially
expand the selection of products on Amazon without having to carry the risks of unsold
inventory. Sellers, who range from small businesses that offer a single product to multinational
firms that sell thousands of products, ultimately bear that risk. As of the first quarter of 2021,
there were over active sellers on Amazon's U.S. Marketplace.

75. Amazon touts to its investors that sellers on the Marketplace are "a key
contributor to the selection offered" to Amazon shoppers. Sellers offer a huge variety of items
for sale, from laptop computers to harnesses for walking pet chickens, complete with bowtie. In
2020, sellers offered more than <sup>1</sup>/<sub>2</sub>% of the unique items available for sale on Amazon. Sellers'
products make up a growing majority of Amazon unit sales—60% in the second quarter of 2023,
up from 55% in 2021.

CASE NO. \_: \_-cv-\_\_\_\_

### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 25 of 172

76. Amazon's online superstore unites its Retail and Marketplace arms, with products 1 intermixed and presented to the public simultaneously and side-by-side. To a shopper browsing 2 on Amazon, there are no obvious differences between the types of listings, nor is there a way to 3 regularly shop for products sold only by Amazon Retail or Amazon Marketplace. 4

5 77. Amazon has achieved unprecedented scale. In 2021, goods worth more than were sold through Amazon's U.S. online store. That amount is larger than the 2021 gross 6 7 domestic product of countries.

8 78. Amazon achieved this astonishing scale in part by combining its Retail and 9 Marketplace arms. Amazon's product selection includes popular and frequently purchased items and a "long tail" made up of an immense variety of less-frequently purchased products. Products 10 11 offered by sellers on Amazon's Marketplace contribute substantially to that "long tail." More generally, Amazon's sellers dramatically increase Amazon's product selection, which draws 12 13 more shoppers to Amazon, which, in turn, attracts more sellers.

14 79. Sellers have also made the Marketplace enormously profitable for Amazon. Amazon's internal documents show that profits from its U.S. Marketplace totaled more than 15 16 in 2021—nearly % of its total reported net income for that year.

17

B.

#### **Amazon's Online Superstore**

80. Shoppers typically reach Amazon using an internet browser or a dedicated 18 Amazon shopping application ("mobile app") on an internet-connected device. Each month in 19 the United States, 126 million people visit Amazon on a mobile device, and more than 42 million 20 people access Amazon on a desktop computer. 21

81. There are more than different products available for sale on Amazon. To 22 navigate this product catalog, Amazon offers a search bar. When shoppers enter a 23 search, Amazon's systems generate a "Search Results Page" that displays product listings 24 COMPLAINT - 21 FEDERAL TRADE COMMISSION CASE NO. : -cv-600 Pennsylvania Avenue, NW

Washington, DC 20580 (202) 326-2222 interspersed with advertisements (discussed in more detail in the next section). Product listings
 on the Search Results Page typically show a name, picture, price, star rating, shipping speed
 estimate, and Prime status (or lack thereof) for each item, as shown in Figures 3a (desktop) and
 3b (mobile).

offer to display in the Buy Box. Amazon calls this displayed offer the "Featured Offer." Being
 chosen as the Featured Offer is commonly known as "winning" the Buy Box.

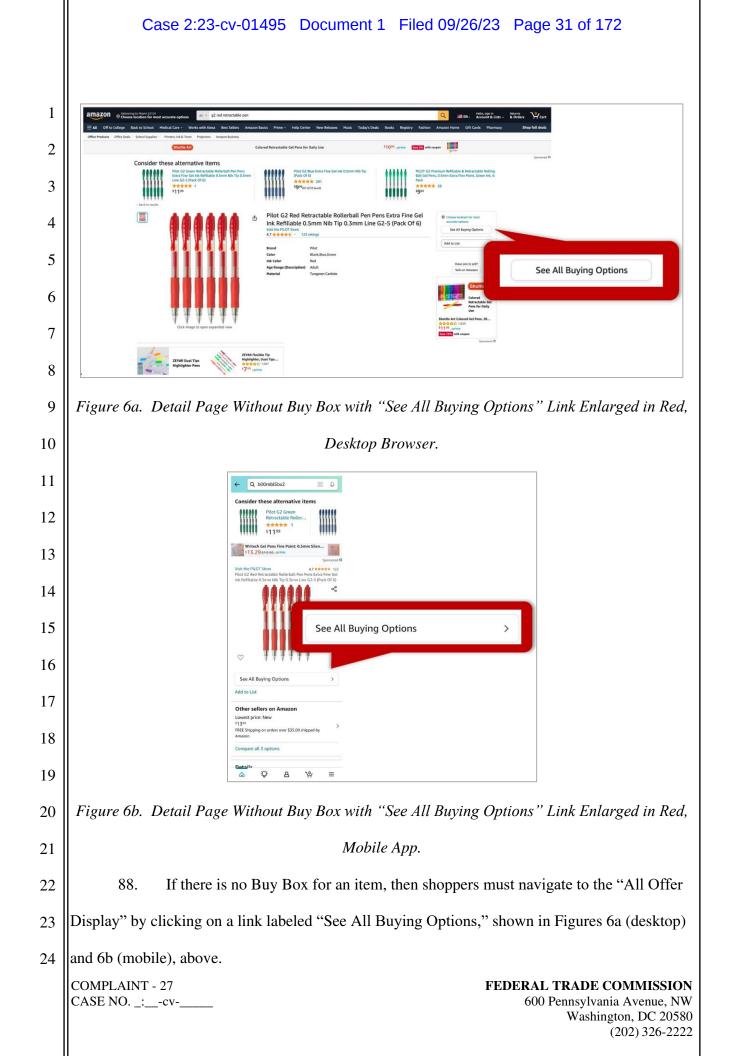

85. Nearly % of all purchases on Amazon are made using the "Add to Cart" and
"Buy Now" buttons in the Buy Box. As a result, winning the Buy Box is essential to making
sales on Amazon.

Amazon deliberately steers shoppers away from offers that are not featured in the 6 86 Buy Box. If a shopper using a computer wants to see an offer from a seller that is not featured in 7 8 the Buy Box, the shopper must either click a link that identifies only the number of additional 9 offers, which takes the shopper to the "All Offer Display," as shown in Figure 5a, or scroll down the page to see "Other Sellers on Amazon," which includes a list of additional sellers Amazon 10 11 has selected. Shoppers using Amazon's mobile app must click on a link labeled "Other Sellers on Amazon" to access the All Offer Display, which opens another page that displays multiple 12 13 offers, as shown in Figure 5b.

97. For shoppers on mobile devices, Sponsored Brand and Sponsored Product advertisements are often the only results visible without scrolling, as shown in Figure 8c.

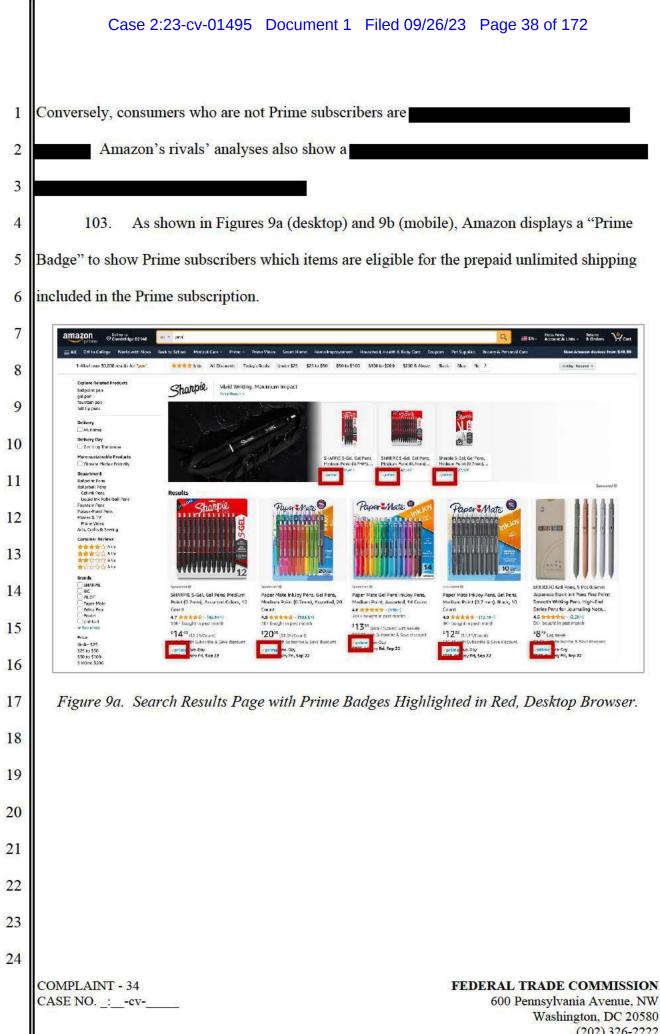

23 a shipping service as part of Prime, with an unlimited two-day shipping promise on eligible items

24 at no per-order cost.

COMPLAINT - 32 CASE NO. \_:\_\_-cv-\_\_\_\_

I

1	99. Over time, Amazon has expanded Prime from a shipping program to a
2	subscription that is, in Amazon's internal assessment,
3	It includes a broad combination of products and
4	services, including many that are unrelated to online retail shopping, such as: (1) Prime Video, a
5	video-on-demand and streaming service; (2) Amazon Music Prime, an ad-free music streaming
6	service; (3) Prime Gaming, a video gaming service that includes downloadable games, exclusive
7	in-game content, and channel subscriptions and badges on Twitch, a livestreaming service
8	Amazon acquired for nearly \$1 billion in 2014; and (4) RxPass, which provides access to a list of
9	eligible prescription medications, including shipping, for a flat \$5 per month fee. Prime
10	subscribers also receive access to exclusive online shopping discounts and promotions such as
11	"Prime Day," a highly publicized annual promotion with exclusive deals for Prime subscribers.
12	100. Amazon has increased the subscription fee for Prime from the original \$79 to
13	nearly double that price, at \$139 per year, with a monthly subscription priced at \$14.99.
<u>14</u>	101. Amazon charges a Prime subscription fee primarily to
15	As Amazon puts it,
16	The Prime subscription fee makes subscribers feel as though they must
17	make the subscription fee worth it by making more purchases on Amazon. A former Amazon
18	employee who was involved in the development of Prime explained that Prime pricing "was
19	never really about the seventy-nine dollars. It was really about changing people's mentality so
20	they wouldn't shop anywhere else."
21	102. According to Amazon's internal analyses,
22	
23	Accordingly, the average Prime subscriber
24	spends <b>each year on Amazon than the average non-Prime Amazon shopper</b> .

1 107. In 2021, Prime subscriber purchases accounted for more than % of the
 2 purchases by dollar amount on Amazon's U.S. online superstore. And in 2021 alone, U.S.
 3 customers paid Amazon more than in Prime subscription fees.

4

12

#### E. Fulfillment By Amazon

5 108. Amazon sells fulfillment services and facilitates delivery under the name
6 "Fulfillment by Amazon," which is commonly abbreviated to "FBA." Sellers can use FBA to
7 fulfill orders made on Amazon.

8 109. "Fulfillment" refers to the process of preparing items for shipping to "fulfill"
9 online orders. Fulfillment involves storing, picking (retrieving from storage), packaging, and
10 preparing items purchased from online retail stores for delivery. Fulfillment operations generally
11 occur within a specialized warehouse called a "fulfillment center."

110. For most online sellers, fulfillment is a significant business cost.

13 111. Delivery is a related but distinct service. "Delivery" refers to the specific process
14 of transporting a package from a fulfillment center to a customer's chosen address. One
15 company may fulfill an order, then transfer the package to a different company for delivery. For
16 example, a fulfillment provider may hand a package off to a parcel carrier like the U.S. Postal
17 Service, FedEx, or UPS, to complete delivery.

18 112. Amazon both fulfills and delivers products purchased on its online superstore. In
2021, Amazon fulfilled nearly % of all orders made on Amazon across both its Marketplace
and Retail business units. Amazon delivers products itself or contracts with a third-party
delivery company to do so. Amazon has estimated that it now makes more deliveries in the
20 United States than any other company.

23 113. When online shoppers buy an item, they also expect fulfillment and delivery of
24 that item.

COMPLAINT - 38 CASE NO. \_:\_\_-cv-\_\_\_\_

1 114. When a seller uses FBA, Amazon charges the seller for storing their items and
 2 charges the seller a fee based on the dimensions and weight of the product when it is purchased.
 3 115. Amazon has increased the fulfillment fees it charges to sellers by approximately
 4 30% in just two years, from 2020 to 2022.

5 116. As explained in Part VI.B, below, sellers have little choice but to use FBA. In
6 2020, more than sellers used FBA to fulfill more than solution orders in the United
7 States.

8 V. AMAZON POSSESSES MONOPOLY POWER IN TWO RELEVANT MARKETS
9 117. Structural and direct evidence show that Amazon has monopoly power in two
10 markets: (1) the online superstore market and (2) the market for online marketplace services
11 (together, the "relevant markets").

118. The structural evidence of monopoly power in both markets includes Amazon's
dominant market shares and the presence of significant barriers to entry, including powerful
network effects and strong economies of scale. These markets and their individual barriers to
entry are discussed further in Parts V.A and V.B, below.

Feedback loops between the two relevant markets further demonstrate the critical 16 119. importance of scale and network effects in these markets. While the markets for online 17 18 superstores and online marketplace services are distinct, an online superstore may operate an 19 online marketplace and offer associated online marketplace services to sellers. As a result, the 20 relationship and feedback loops between the two relevant markets can create powerful barriers to 21 entry in both markets. Amazon offers an illustration of this dynamic: Amazon's base of 22 shoppers in the online superstore market attracts sellers to buy services from Amazon in the 23 online marketplace services market. Amazon in turn relies on those sellers to increase the 24 breadth and depth of goods offered on Amazon's online superstore, which further draws COMPLAINT - 39 FEDERAL TRADE COMMISSION CASE NO. : -cv-600 Pennsylvania Avenue, NW

600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222

#### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 44 of 172

shoppers to Amazon. In addition, Amazon imposes restrictions on how shoppers can purchase
 its Prime subscription program to artificially increase barriers to entry in the online superstore
 and online marketplace services markets. These scale and network effects reinforce Amazon's
 monopoly power in both relevant markets, as explained in Part V.C, below.

5 120. Direct evidence also demonstrates Amazon's monopoly power. Amazon has
6 continually exercised its monopoly power and degraded the customer experience

8 Amazon worsens quality and hikes prices for both shoppers and 9 sellers, all without denting—and while in fact expanding— its dominance. This and other direct 10 evidence of Amazon's monopoly power are discussed further in Part V.D, below.

A. Amazon Has Durable Monopoly Power In The Online Superstore Market
 12 121. Amazon has durable monopoly power in the online superstore market.

13

7

#### The U.S. online superstore market is a relevant market

14 122. The online superstore market is a relevant product market. Online superstores 15 compete to build long-term relationships with consumers across multiple purchases of a variety 16 of items. Online superstores do so by offering a distinct set of features that reduce time and 17 effort for shoppers online, thereby encouraging shoppers to return to those online superstores for 18 a broad swath of goods. Because of these and other features, brick-and-mortar stores and online 19 stores with a more limited selection are not reasonably interchangeable with online superstores 20 for the same purposes and are thus properly excluded from the online superstore market.

21

123. The relevant geographic market is the United States.

22

#### a. Online superstores offer shoppers a unique set of features

23 124. An online superstore offers an extensive breadth and depth of product selection

24 accessible through an online storefront. "Breadth" refers to product offerings across multiple

COMPLAINT - 40 CASE NO. : -cv-

1.

#### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 45 of 172

categories, such as sporting goods, kitchen goods, apparel, and consumer electronics. "Depth"
 refers to product selection within a given product category, such as a range of different brands of
 a product with different price points, levels of quality, sizes, and colors.

125. Consumers incur shopping costs beyond the prices paid for purchased items. For
example, when considering a purchase, shoppers must determine which stores carry specific
items. Shoppers then often conduct research, including learning about the items' prices and
features, reading consumer reviews, and comparing similar items. Shoppers value stores that
reduce search costs and the ability to discover new items that they may not have been initially
searching for while shopping. Many consumers also value shopping for different types of goods
at a single store to reduce overall shopping costs.

11 126. Online superstores provide shoppers a unique offering: 24/7 access to a broad and
12 deep product selection accompanied by a distinct set of features that meaningfully reduce the
13 time and effort shoppers expend online. These features include tools to help shoppers quickly
14 search for and identify their desired items, compare different items, and purchase and receive
15 items, all from a single website or app. Online superstores provide these features to develop
16 long-term relationships with shoppers, entice shoppers to buy more products during a single
17 shopping trip, and encourage them to come back again.

18 127. Several characteristics distinguish online superstores from other forms of retail,
19 including brick-and-mortar stores and online stores with comparatively limited selection.

20 128. First, online superstores offer a single destination for shoppers to browse a large
21 and diverse selection of goods from multiple brands across a wide range of categories, reducing
22 consumers' shopping costs and encouraging customers to make an online superstore a preferred
23 destination for a variety of shopping needs.

24

COMPLAINT - 41 CASE NO. \_:\_\_-cv-\_\_\_\_

129. By offering a broad selection, online superstores reduce the shopping costs of 1 visiting multiple stores for goods spanning multiple categories. By offering a deep selection 2 within any given category, online superstores decrease the shopping costs of visiting multiple 3 category-specific or brand-specific stores to identify the best options. 4

5 130. The breadth and depth of selection available at online superstores encourages shoppers to return to and shop at those stores more regularly. Shopping regularly at the same 6 online superstore leads to reduced shopping costs by increasing shoppers' familiarity with an 7 8 online superstore's format, features, offerings, and customer service process. Repeated use of an 9 online superstore can also provide confidence about its reputation and quality. Increased familiarity, a positive reputation, and perceived high quality all make it more likely that a 10 shopper will choose an online superstore as a preferred destination for purchasing retail goods 11 online. 12

Industry participants, including Amazon, have long recognized an online 13 131. superstore's unique ability to leverage a broad and deep selection of goods to compete for repeat 14 15 customers. For example, Mr. Bezos explained in his 1999 letter to Amazon shareholders that 16 "[e]ach new product and service we offer makes us more relevant to a wider group of customers 17 and can increase the frequency with which they visit our store.... The more frequently customers visit our store, the less time, energy, and marketing investment is required to get them 18 19 to come back again."

20132. Second, online superstores are not limited to traditional operating hours that 21 constrain brick-and-mortar retailers. Instead, online superstores offer a quick, on-demand 22 shopping experience at all times of the day or night. Online superstores allow shoppers to 23 browse and buy across a wide variety of goods 24 hours a day, 7 days a week, 365 days a year. 24 Shoppers can also pause and resume their shopping session on an online superstore at any time. **COMPLAINT - 42** FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_\_

- 1 133. Third, shoppers can make purchases on online superstores anywhere they have
   2 internet access, through a website or an app on a desktop, tablet, or smart phone.
- 3 134. Fourth, online superstores offer sophisticated filtering and discovery tools,
  4 allowing shoppers to browse and sift through the store's entire catalog quickly and efficiently.
- 5 135. Online superstores also have access to data on items consumers have previously
  6 searched for and purchased. Online superstores may use this data to offer repeat visitors tailored
  7 and personalized shopping experiences that can, for example, include recommendations for
  8 future purchases based on past search or purchase behavior.

9 136. Fifth, online superstores offer research tools, including detailed information on a
given item and a large volume of authentic, customer-generated ratings and reviews. Online
superstores give shoppers a single point of access to these research tools, including text
descriptions, photos, videos, and user reviews. The product detail pages available on online
superstores often include far more information than physical packaging can accommodate. For
example, a product detail page can include links to user guides and product documentation that
would otherwise only be accessible inside of a product's packaging.

16 137. Sixth, online superstores provide shoppers a familiar and convenient checkout
17 experience. Online superstores reduce shopping costs by allowing customers to store personal
18 information like payment details, home addresses, passwords, and other sensitive information.
19 For example, Mr. Bezos

- 20
- 21

138. Seventh, online superstores offer shoppers a convenient and consolidated post purchase experience. Shoppers who buy multiple items from an online superstore can often
 schedule them to be delivered together, limiting the need to keep track of multiple delivery times

1 and decreasing packaging. Mr. Bezos

2

139. This combination of features distinguishes online superstores from brick-and-3 mortar stores and from other online stores with comparatively limited selection. Even though 4 5 such stores may price certain items comparably with online superstores, shoppers do not seriously consider those stores as reasonable alternatives to online superstores for a significant 6 portion of their shopping needs. Online superstores differentiate themselves by offering a 7 8 particular shopping experience to the sizeable group of consumers who view that experience as distinct and prefer to shop at online superstores. 9 Online superstores are not reasonably interchangeable with 10 b. 11 brick-and-mortar stores 140. Online superstores are distinct from, and not reasonably interchangeable with, 12 13 brick-and-mortar stores. From start to finish, online superstores provide a vastly different shopping experience from physical stores. 14 15 141. Unlike online superstores, brick-and-mortar stores require shoppers to travel to a specific location. As Mr. Bezos noted in his 2020 letter to Amazon shareholders, "[r]esearch 16 suggests the typical physical store trip takes about an hour" and requires "driving, parking, 17 searching store aisles, waiting in the checkout line, finding your car, and driving home." Mr. 18 19 Bezos contrasted this experience with shopping on Amazon, where more than a quarter of all purchases are completed "in three minutes or less," and half of all purchases take less than 20 fifteen minutes. 21 22 142. Brick-and-mortar stores can display only items that fit on the store's limited 23 physical shelf space, while online superstores can offer a practically unlimited number of items 24 for sale. As Amazon's then-Vice President of Physical Stores explained in 2018, "whenever you COMPLAINT - 44 FEDERAL TRADE COMMISSION CASE NO. : -cv-600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222

1	are working offline, you can't have the endless aisle that you have online, and so when you're
2	working offline you really have to curate."

Amazon recognizes that its unlimited shelf space appeals to shoppers and 3 143. distinguishes its online store from brick-and-mortar stores. As Amazon has reminded its 4 shareholders every year since 1998, "[w]e brought [shoppers] much more selection than was 5 possible in a physical store . . . and presented it in a useful, easy-to-search, and easy-to-browse 6 format in a store open 365 days a year, 24 hours a day." 7

8 Amazon internally contrasts the benefits of the depth of selection available in its 144. online superstore with the "clear gaps" in selection at physical stores. As shown in Figure 12 9

11	
12	
13	Figure 12. Amazon Slide
14	Source: Amazon Internal Documents.
15	145. Brick-and-mortar stores also cannot tailor or personalize a consumer's shopping
16	experience in the same way an online superstore can. Physical stores have the same layout for
17	any shopper browsing their selection at any given time.
18	146. The process of searching and shopping for items at brick-and-mortar stores is
19	much different than the process of searching and shopping on an online superstore. Shoppers on
20	online superstores can use sophisticated digital filtering and search tools to browse and select
21	items, instead of physically traveling up and down aisles or asking a store employee for help.
22	Online superstore shoppers can make purchases without waiting in physical checkout lanes. And
23	online superstore purchases typically ship to the shopper's address. On the other hand, shoppers
24	can see products in person before buying at brick-and-mortar stores and can typically take
	COMPLAINT - 46 FEDERAL TRADE COMMISSION CASE NO:cv 600 Pennsylvania Avenue, NW Washington DC 20580

Washington, DC 20580 (202) 326-2222

purchased items home immediately. As Amazon's then-Vice President of Physical Stores 1 explained in a 2018 interview, "another thing you can do in offline retail that you can't do online 2 is customers can come in and touch the products themselves ... try those products first person, 3 get a feel for them, [and] talk to an associate." 4 5 Online and brick-and-mortar stores also involve distinct operations. Because 147. different expertise is required to manage an online store, companies that operate both typically 6 7 run them through separate divisions. For example, 8 9 Amazon's CEO, Andy Jassy, has publicly emphasized that "[t]he things you think about in physical retail" from an operational perspective, like 10 11 "lighting," "parking," and "physical merchandising," are "radically different things than you think about in an online retail environment where technology is really driving the entire 12 experience." 13 14 Online superstores are not reasonably interchangeable with C. 15 other online stores that lack breadth and depth of product selection 16 148. Online superstores are also distinct from, and not reasonably interchangeable 17 with, online stores with limited product selection, including online stores that offer products 18 19 primarily from a single brand. Whether considered individually or collectively, online stores 20 with limited selection are not reasonable substitutes to become a shopper's preferred destination 21 for their online purchases for a broad swath of retail goods. Shopping at numerous limited-22 selection online stores increases shopping costs, both for individual shopping needs and in 23 aggregate across a customer's total purchases. Consumers' overall shopping costs would 24 COMPLAINT - 47 FEDERAL TRADE COMMISSION CASE NO. : -cv-600 Pennsylvania Avenue, NW Washington, DC 20580

(202) 326-2222

increase dramatically if they tried to replace online superstores with shopping at multiple
 limited-selection online stores.

3 149. Some consumers may prefer to shop at limited-selection online stores for certain
4 items. For example, a consumer may turn to such an online store because it specializes in unique
5 or niche goods not available on an online superstore, because the shopper has particular brand
6 loyalty, because the shopper finds the online store particularly trustworthy and reliable (because,
7 for example, it screens for counterfeit goods or fake reviews), or because the non-superstore
8 offers specialized or expert knowledge about the items it sells.

9 150. Limited-selection online stores do not provide an experience that is reasonably
10 interchangeable with an online superstore because, individually and collectively, they cannot
11 effectively compete to become a shopper's preferred destination for online purchases given the
12 increased shopping costs associated with shopping at online stores that lack the breadth and
13 depth of online superstores.

14 151. Online stores with a limited product selection lack breadth. A shopper who must
15 visit multiple online stores to compile a set of desired goods across different product categories
16 faces higher shopping costs than a shopper who can search for and complete those cross-category
17 purchases at a single online superstore.

18 152. RainOrShineGolf.com—a retailer of indoor golf simulator equipment—is an 19 illustrative example of an online store that lacks the breadth of an online superstore. Golf 20simulator equipment such as golf ball launch monitors, mats, nets for hitting balls, and software 21 to analyze performance collectively allow a customer to practice golf indoors. While Rain or 22 Shine Golf and Amazon both sell indoor golf simulator equipment, they offer consumers 23 different shopping experiences and a vastly different overall product due to the difference between the breadth of product selection at each online store. Shoppers may choose Rain or 24 **COMPLAINT - 48** FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_ 600 Pennsylvania Avenue, NW Shine Golf for occasional category-specific purchases, but due to its limited breadth it could not
 become a consumer's preferred destination for a broad swath of other online purchases.

153. 3 Unlike limited-selection online stores, an online superstore offers a single destination for a shopper to browse, buy, and return to for repeat purchases of a much wider 4 5 array of goods. On an online superstore like Amazon, shopping for a golf simulator may also yield cross-category suggestions for accessories like golf gloves, golf clubs, or golf bag push 6 carts. Moreover, if the need arises or mood strikes, a consumer shopping on an online superstore 7 8 like Amazon could resupply the correct size of kitchen trash bags they previously purchased and 9 add a new board game that the online superstore recommends based on their prior shopping behavior, all during a single shopping session. By contrast, a consumer who uses Rain or Shine 10 11 Golf to buy a golf simulator but would also like to make a set of additional purchases would need to visit and do business with numerous other online stores. Those visits would incur the added 12 shopping costs of finding those additional items, completing the various purchase processes with 13 different logins and credentials (if the shopper can remember them), and arranging for multiple 14 deliveries. 15

16 154. Many online stores that lack breadth of product selection also lack depth,
17 especially online stores that primarily or exclusively feature their own brands. A shopper forced
18 to visit multiple online stores to find the specific item that matches their needs faces higher
19 shopping costs than a shopper who can compare across a depth of options for that item on an
20 online superstore.

I

1	of brands that may include Tumi as well as other brands. The shopper can peruse these options
2	by filtering across features like brand, price point, size, and colors without incurring the
3	additional search costs present in visiting all of the online stores operated by each brand.
4	156. Furthermore, the breadth and depth of product selection on online superstores
5	increases access to valuable cross-category consumer data. This data amplifies the ability of
6	online superstores to provide shoppers with tailored and personalized shopping experiences. As
7	an online superstore, for example, Amazon recognizes in internal documents that
8	
9	
10	
11	157. These additional capabilities of online superstores influence consumers' shopping
12	behavior.
13	
14	158. Because limited-selection online stores do not have the same breadth and depth of
15	selection offered by online superstores, they have access to less consumer data across categories
16	and cannot replicate the personalization features of online superstores, reducing the ability of
17	limited-selection online stores to compete with online superstores.
18	159. Online superstores treat rival online superstores differently than limited-selection
19	stores. For example, Amazon does not allow other online superstores like Walmart.com to sell
20	through Amazon. Yet Amazon encourages hundreds of thousands of sellers—including well-
21	known brands that sell through their own online stores or limited-selection online stores—to do
22	so.
23	
24	
	COMPLAINT - 50       FEDERAL TRADE COMMISSION         CASE NO. :cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222

1 2

## d. The online perishable grocery category is properly excluded from the online superstore market

160. Online purchases of perishable grocery products are not part of the online
superstore market. Perishable groceries are foods that cannot be safely stored at room
temperature, including fresh fruits and vegetables, raw meat, and frozen items. Though some
online superstores may also offer online purchases of perishable grocery products, this distinct
business line is not part of the relevant market and is excluded from the market share numbers in
Part V.A.2, below.

9 161. Consumers' experiences when shopping online for perishable groceries differ from their experiences purchasing other retail goods. For example, consumers shopping for 10 online perishable grocery products typically must select a specific time for the perishable grocery 11 products to be delivered, which often also requires the customer to be present at the time of 12 delivery to be able to promptly store those items. Both Walmart.com's and Amazon's online 13 perishable grocery businesses require shoppers to choose a delivery window or "time slot." 14 Neither Walmart.com nor Amazon typically require shoppers to choose time slots when 15 16 purchasing other products online.

17 162. The process for packaging and delivering perishable groceries to shoppers who
ordered them online also differs from non-perishable grocery orders. Perishable groceries
require special handling, often including refrigeration or freezing, as well as quick and careful
delivery to avoid damage or rot. As such, perishable grocery delivery requires specialized
storage facilities with refrigeration systems that serve a smaller geographic footprint.

163. Competition for online perishable grocery sales is also different from competition
 between online superstores. Competition for online perishable grocery sales is generally more
 localized, whereas online superstore competition is nationwide. This difference is because
 COMPLAINT - 51
 CASE NO. \_:\_\_-cv-\_\_\_\_
 FEDERAL TRADE COMMISSION 600 Pennsylvania Avenue, NW

### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 56 of 172

1	grocery quality and shelf life are seasonal and regional. For example, perishable fruit may be
2	available only during certain times and in certain regions. As a result, Amazon
3	
4	
5	e. The relevant geographic market is the United States
6	164. The United States is the relevant geographic market for the online superstore
7	market. Online superstores that serve consumers shopping for items to be delivered within the
8	United States generally do not compete for those consumers with online superstores that
9	primarily serve consumers shopping for items to be delivered outside of the United States.
10	Consumers shopping online for items to be delivered within the United States generally make
11	purchases from market participants' U.S. businesses and U.Sfacing online stores. For example,
12	Amazon operates an online storefront for shoppers in the United States (Amazon.com) separately
13	from its storefront for shoppers in the United Kingdom (Amazon.co.uk). The difference is not
14	just in their URLs; rather, despite being in the same language, they offer different products, at
15	different prices, under different shipping terms, and present unique search results and
16	advertisements.
17	165. Online superstores that primarily serve shoppers seeking delivery outside the
18	United States are not reasonable substitutes for shoppers seeking delivery within the United
19	States because they offer a shopping experience tailored to those other countries, with different
20	currencies, prices, customs and border control conditions, and shipping terms. In the ordinary
21	course of business, industry participants identify competitors for U.S. shoppers separately from
22	competitors that serve shoppers seeking items to be delivered to other countries.
23	
24	
	COMPLAINT - 52       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW

600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222 1 2 2.

#### Amazon has a dominant share of the online superstore market

166. Amazon maintains a dominant market share when compared to other online superstores. Documents and data, both from Amazon and industry analysts, confirm that 3 Amazon's share of the overall value of goods sold by online superstores is well above 60%—and 4 5 rising.

Amazon's market share, when considered in conjunction with other 167 6 characteristics of the online superstore market including its significant barriers to entry (see Parts 7 8 V.A.3 and V.C, below), demonstrates Amazon's monopoly power.

168. Gross Merchandise Value ("GMV") measures the total sales value of goods sold 9 to customers during a given time period and is commonly used to track the market share of 10 11 online stores. Other financial indicators, such as revenue or net sales, may factor in commission fees or discounts that can vary both within a single store and across different stores. GMV does 12 not. Accordingly, a calculation of Amazon's GMV captures the total value of goods sold 13 through both its Retail and Marketplace arms. Third-party reports, including those utilized by 14 15 Amazon, regularly use GMV to compare Amazon to other firms.

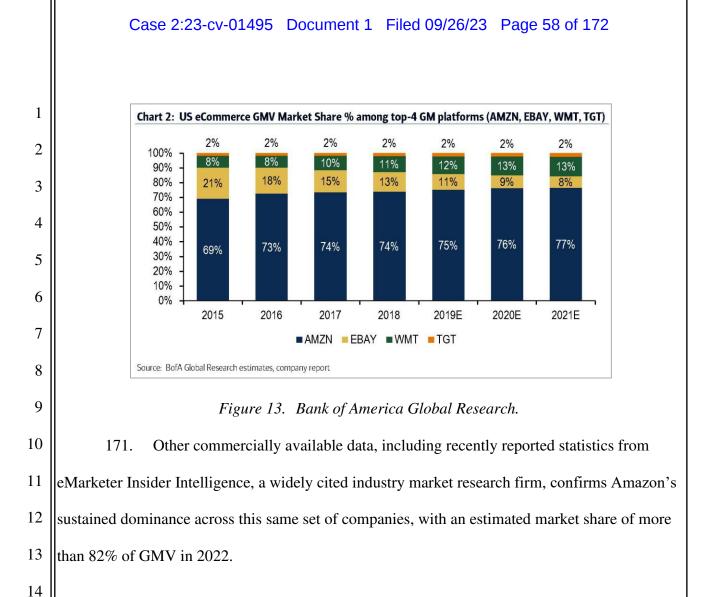

16 169. When measured by GMV, Amazon's business vastly overshadows that of all 17 other online stores in the United States.

18 170. Industry analysts and industry participants often track Amazon's U.S. online store 19 by reference to Walmart, Target, and eBay. According to third-party reports that assess market 20share across these "top-4 general merchandise platforms," Amazon has maintained an estimated 21 market share of more than 69% of GMV since 2015, with that share growing over time.

22 23

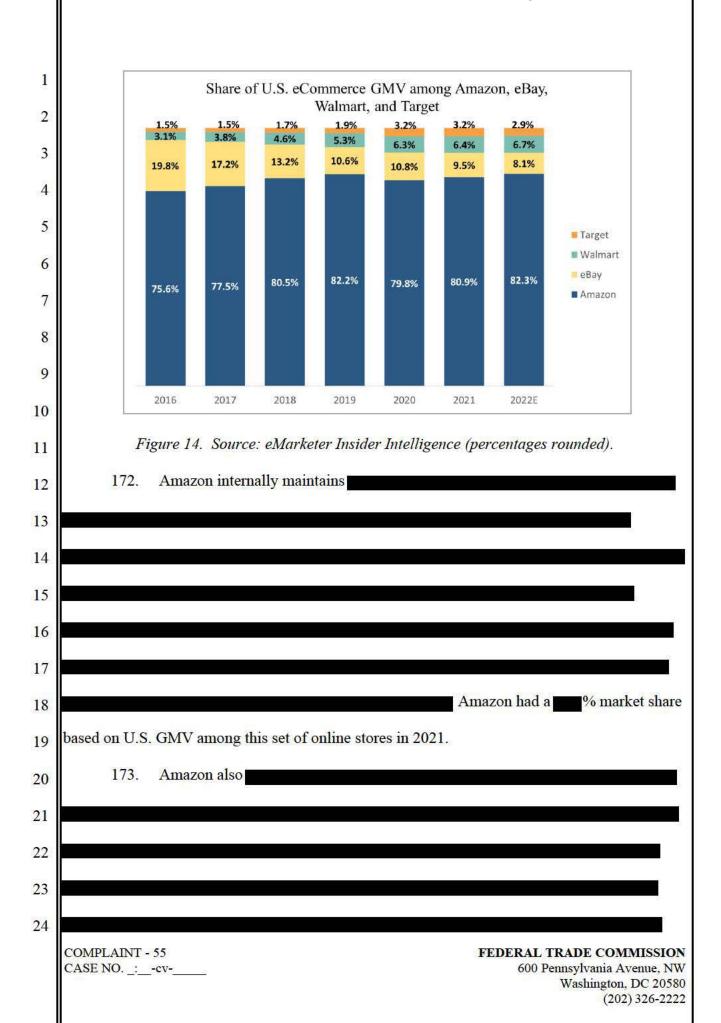

24

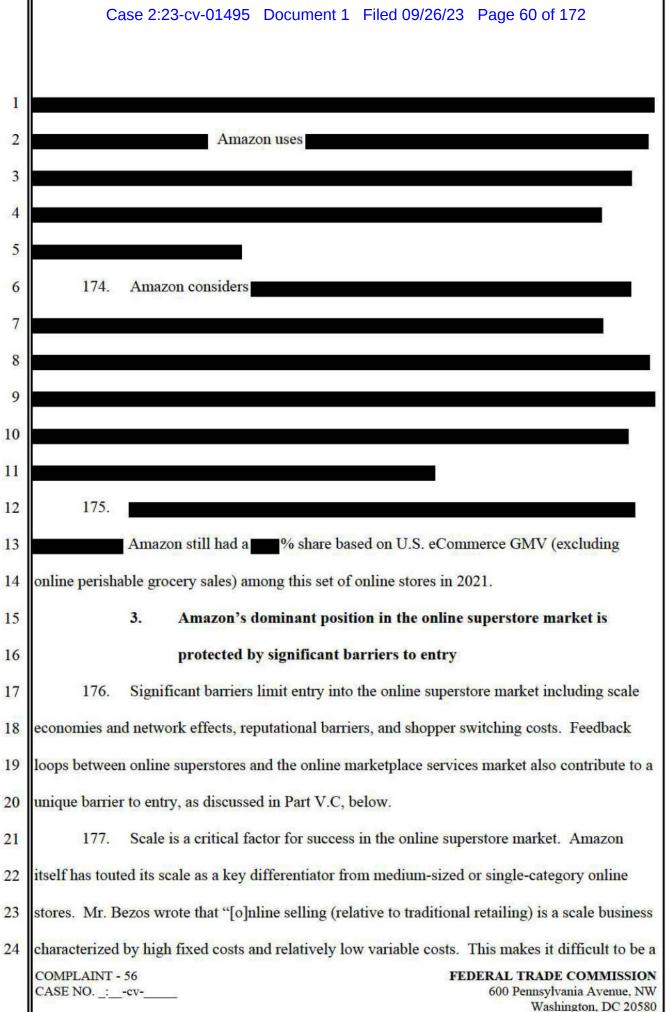

**COMPLAINT - 53** CASE NO. \_:\_\_-cv-\_\_

COMPLAINT - 54 CASE NO. \_:\_\_-cv-\_\_\_

Washington, DC 20580 (202) 326-2222

#### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 61 of 172

medium-sized e-commerce company," and "difficult . . . for single-category e-commerce
 companies to achieve the scale necessary to succeed." According to Mr. Bezos, "build[ing] an
 important and lasting company . . . in e-commerce" simply "isn't going to work in small
 volumes." Economies of scale are a barrier to entry in this market that new firms must overcome
 in order to enter and compete.

178. The online superstore market is also characterized by network effects, where the
value of the service increases as more people use it. Network effects are not intrinsically
harmful, but they can present barriers to entry and to competition, reinforcing market power and
insulating incumbents.

10 179. One aspect of the importance of scale and related network effects in the online superstore market stems from user-generated reviews. For example, as Amazon's shopper base 11 has grown, so too has the number of product ratings and reviews available on its store, a 12 feedback loop that further draws in new shoppers by enabling them to quickly learn more about 13 unfamiliar products or sellers. In other words, by leaving helpful ratings and reviews, Amazon's 14 shoppers themselves provide immense value to future Amazon shoppers. Amazon benefits from 15 16 this self-reinforcing dynamic, which would be difficult and expensive for new entrants to reproduce. 17

18 180. Another source of network effects in the online superstore market is access to
19 valuable shopper data, which allows online superstores to tailor and personalize shopping
20 experiences. For example, Amazon records information about the items a shopper searches for,
21 views, places in their cart, and pays for, and the mechanism the shopper uses to pay. This type
22 of data allows an online superstore to streamline a shopping experience and target specific
23 products to certain customers. As with other network effects, the more scale an online superstore

24

COMPLAINT - 57 CASE NO. \_:\_\_-cv-\_\_\_\_

gains, the more powerful this effect becomes. Prospective entrants would have to acquire a
 sufficient shopper base to obtain enough data to offer this level of personalization.

181. The online superstore market also exhibits reputational barriers to entry.
Reputational barriers to entry arise when entrants need to establish trust among customers to
compete meaningfully against incumbents. Because online superstores allow and encourage
repeat purchasing, they are able to develop positive reputations with shoppers that a prospective
entrant starting from scratch would need to cultivate.

8 182. Switching costs also are a barrier to entry in the online superstore market. 9 Mr. Bezos recognized this dynamic and its implications in a speech in 1998, stating that "switching costs long-term . . . should actually be higher in the online world than in the physical 10 11 world" because "[i]n the online world, businesses have the opportunity to develop very deep relationships with customers, both through accepting preferences of customers and then 12 observing their purchase behavior over time, so that you can get that individualized knowledge 13 of the customer and use that individualized knowledge of the customer to accelerate their 14 15 discovery process." For example, Amazon retains shoppers' payment, shipping, and order 16 history information. Switching to a new online superstore would require reentering payment and 17 shipping information and forgoing the benefits of viewing past order history. Shoppers also develop routines while shopping at online superstores that can be difficult to break, particularly 18 given the additional costs of gaining familiarity with the format, features, and policies of a 19 20 different store.

21 183. Finally, as described in detail below in Part VI, Amazon engages in an illegal
22 course of conduct that raises barriers to entry and competition, making it artificially and
23 substantially more costly and time-consuming for would-be competitors to enter the online

24 superstore market.

COMPLAINT - 58 CASE NO. \_:\_\_-cv-\_\_\_\_

#### В. Amazon Has Durable Monopoly Power In The Online Marketplace Services Market

184. Amazon has durable monopoly power in the online marketplace services market. 185. Online marketplace services include: (a) access to a significant base of shoppers in the United States who use the online marketplace to find and buy goods; (b) an interface for consumer search that allows sellers' products to be discovered and purchased without shoppers needing to leave the online marketplace; (c) the ability for sellers to set the prices for their goods 7 8 on the online marketplace; (d) the ability for sellers to create and maintain product detail pages with product information and specifications on the online marketplace; and (e) the ability for 9 sellers to display to potential shoppers on the online marketplace an array of customer-generated 1011 ratings and reviews.

12

#### 1. **Online marketplace services is a relevant market**

186. Online marketplace services is a relevant product market. Online marketplaces 13 offer sellers a distinct set of services. Chief among these services is access to an established 14 15 online U.S. customer base. Purchasing online marketplace services is not reasonably 16 interchangeable with selling as a vendor to either an online or a brick-and-mortar retail store. 17 Nor are online marketplace services reasonably interchangeable with the offerings of online software-as-a-service providers. Some providers of online marketplace services also offer 18 19 fulfillment services, which sellers can purchase in addition to online marketplace services.

20187. The relevant geographic market for online marketplace services, which provide 21 sellers access to U.S. shoppers, is worldwide.

22

Online marketplace services offer sellers a unique set of features a.

> Washington, DC 20580 (202) 326-2222

23 188. Online marketplace services encompass a suite of services that facilitate sellers 24 making online sales to U.S. shoppers without having to directly operate an online store. The **COMPLAINT - 59** FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_ 600 Pennsylvania Avenue, NW

sellers who typically purchase online marketplace services are businesses seeking to sell goods
 directly to U.S. shoppers by relying on the marketplace to attract shoppers rather than attracting
 shoppers solely on their own. These sellers use online marketplace services so that U.S.
 shoppers can find and buy the sellers' offered items.

189. Access to a large customer base is the most important characteristic of an online
marketplace. Amazon advertises to prospective sellers that its marketplace allows them "to
reach the hundreds of millions of customers who visit Amazon to shop," which can "[r]educe the
time, effort, and money [they] spend on customer acquisition." Similarly, Walmart advertises
that its marketplace gives sellers access to "a built-in audience of frequent shoppers and loyal
customers" and tells sellers that "[y]ou bring great products. We bring millions of customers."
eBay tells sellers that "millions of buyers are waiting."

12 190. Industry participants recognize online marketplace services as a distinct retail
13 product. Many industry observers track online marketplaces separately from other types of
14 online commerce.

15

16

## b. Online marketplace services are not reasonably interchangeable with selling as a vendor

191. 17 Selling products as a vendor to a retail store, whether online or offline, who then sells to shoppers is not reasonably interchangeable with buying online marketplace services. 18 19 192. Selling products as a vendor to a retailer involves a pricing and transaction 20structure different from buying online marketplace services. A vendor generally sells goods to a 21 retailer for a wholesale price. The retailer takes legal title to the goods and can sell them to 22 shoppers. Online marketplace services providers price their services differently, typically 23 including a percentage-based commission fee. The seller retains legal title to the goods and sells 24 those goods directly to shoppers on the online marketplace.

COMPLAINT - 60 CASE NO. \_:\_\_-cv-\_\_\_

1 193. A vendor typically sells goods in batches to retailers, such as in a wholesale
 2 relationship. A seller operating through an online marketplace, by contrast, typically sells goods
 3 one at a time to online shoppers.

4 194. Vendor arrangements also exhibit different features and characteristics from
5 online marketplace services. A vendor usually gives up the ability to set the price offered to
6 shoppers, and the retailer typically sets the shopper-facing prices. But sellers who buy online
7 marketplace services retain the ability to set and adjust prices to shoppers. Many merchants
8 prefer purchasing online marketplace services to vending to a retailer so that they can retain the
9 ability to set their own prices to final customers.

10 195. Selling as a vendor often requires the vendor to give physical control of its goods
11 to the retailer. That reduces the vendor's ability to decide which goods to offer and when to
12 make goods available. Unlike the retailer model, an online marketplace services provider allows
13 sellers to maintain control over which of its goods will be offered at what times.

14 196. Selling as a vendor also limits the seller's access to retail sales data, which is
15 usually controlled by the retailer. Some providers of online marketplace services, including
16 Amazon, provide customer-level sales and shopping data to sellers but not vendors.

17 197. Industry participants recognize that these are important distinguishing
18 characteristics. For example, Walmart tells sellers that using its marketplace allows them to
19 "[r]emain in control of your business."

20

21

## c. Online marketplace services are not reasonably interchangeable with services sold by SaaS providers

22 198. Software-as-a-service ("SaaS") providers, including Shopify and BigCommerce,
23 sell software that enables sellers to create and maintain their own direct-to-consumer online

24

COMPLAINT - 61 CASE NO. \_:\_\_-cv-\_\_\_\_

stores. Sellers use this software to build and customize their own eCommerce websites. These
 SaaS providers' services are not reasonably interchangeable with online marketplace services.

199. SaaS providers, unlike online marketplace service providers, do not provide
access to an established U.S. customer base. Rather, merchants that use SaaS providers to
establish direct-to-consumer online stores must invest in marketing and promotion to attract U.S.
shoppers to their online stores. As Mr. Jassy explained in a 2022 interview, "small and medium
sized" sellers use Amazon not because of the "eCommerce software" Amazon provides but
"because they get access to a few hundred million customers."

9 200. Another difference is that SaaS providers allow their customers to exercise
10 control over branding and marketing in ways marketplaces do not. For instance, SaaS providers
11 typically enable merchants to customize the look of their website and grant them access to all
12 consumer analytics, while allowing merchants to reach out to shoppers directly with sales
13 promotions and new releases.

14

15

## d. Online marketplace services are not reasonably interchangeable with services that primarily provide access to non-U.S. shoppers

201. Sellers who want to reach U.S. shoppers generally only consider online
marketplaces that already possess a significant U.S. customer base and facilitate sales to U.S.
shoppers through U.S.-specific marketplaces. Online marketplace service providers typically
operate distinct websites focused on customer bases by different geographies; these websites list
prices in the local currency and operate differently to ensure compliance with local law.

21 202. Online marketplaces set different fees across their various geography-specific
22 websites.

2.

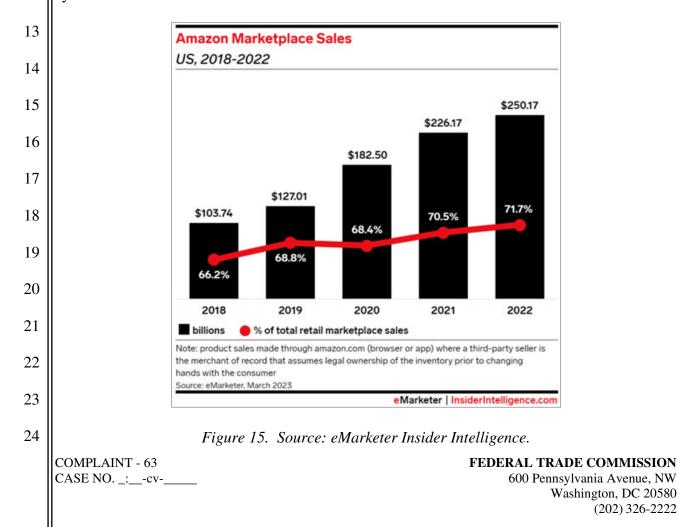

1

## e. The relevant geographic market for online marketplace services for sales to U.S. shoppers is worldwide

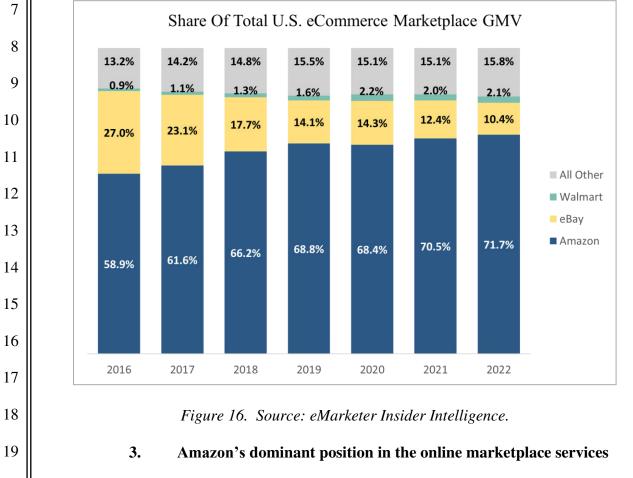

203. Online marketplace services, which provide sellers access to U.S. shoppers, are procured by sellers worldwide. Online marketplace services providers supply such services for sales to U.S. shoppers from anywhere in the world.

# Amazon has a dominant share of the online marketplace services market

8 204. Amazon has a durable and dominant share of the online marketplace services
9 market. According to commercially available data sources and as illustrated in Figure 15, below,
10 Amazon has maintained a market share of greater than 66% of marketplace sales, as measured by
11 GMV, across all tracked marketplaces since at least 2018, and that share grew to more than 71%
12 by 2022.

205. In 2021, sales by sellers on Amazon's online U.S. Marketplace accounted for an
 estimated \$226 billion in GMV, more than five times the estimated amount sold by sellers on
 eBay's online U.S. marketplace and more than thirty-four times the estimated amount sold by
 sellers on Walmart's online U.S. marketplace. Amazon's market share across all tracked retail
 marketplaces dominates—and is continuing to outgrow—that of eBay and Walmart, as shown in
 Figure 16 below.

#### market is protected by significant barriers to entry

(202) 326-2222

21 206. The online marketplace services market exhibits significant barriers to entry,
 22 including, for example, scale economies, switching costs, and network effects. Network effects
 23 between the online marketplace services and online superstore markets also present a unique
 24 barrier, as discussed in Part V.C, below. Moreover, Amazon's illegal course of conduct has
 COMPLAINT - 64 FEDERAL TRADE COMMISSION
 CASE NO. \_:\_\_-cv-\_\_\_\_\_
 600 Pennsylvania Avenue, NW
 Washington, DC 20580

made entry artificially and significantly more difficult than it would otherwise be, as discussed in
 Part VI, below.

207. The market for online marketplace services is also characterized by network
effects. For example, as an online marketplace serves more sellers, it can collect, analyze, and
offer robust aggregated sales data to its sellers, who can use the data to inform their business
decisions. A marketplace's increased ability to offer useful sales data to sellers helps it attract
more sellers, which allows the marketplace to collect more data, and so on.

8 208. As an online marketplace gains sellers, it also becomes more appealing to sellers
9 who offer products that are complements to the products already offered on the marketplace. For
10 example, a seller of cell phone cases may be more interested in selling on a marketplace on
11 which cell phones are also sold.

12 13 C.

## Feedback Loops Between The Relevant Markets Further Amplify The Cumulative Impact Of Scale And Related Network Effects

14 209. The ability to gain scale is a critical factor in determining who can successfully
15 compete in both relevant markets. The feedback loop between these two relevant markets
16 further amplifies the importance of scale and network effects in these markets, making it more
17 difficult for rivals and potential rivals to enter and compete effectively against incumbents in the
18 relevant markets.

Online superstores that also offer online marketplace services operate in both 19 210. 20relevant markets and benefit from scale and network effects that flow between-and reinforce 21 market power across—those markets. Though an online superstore does not necessarily need to 22 operate a marketplace, network effects between the two markets create an additional barrier to 23 entry for companies attempting to enter and compete in either market. For online superstores with marketplaces, increasing scale in one market can make it easier to grow in the other, and a 24 FEDERAL TRADE COMMISSION **COMPLAINT - 65** CASE NO. \_:\_\_-cv-\_ 600 Pennsylvania Avenue, NW

> Washington, DC 20580 (202) 326-2222

I

1	denial of scale in one market can make it harder to grow in the other. By amplifying the
2	importance of scale in both markets, these network effects can intensify the harmful impact of
3	conduct that unlawfully deprives rivals of scale, widening the gulf between firms that can and
4	cannot effectively compete.
5	211. To attract shoppers, an online superstore needs to offer a wide breadth and depth
6	of product selection. Online superstores that operate marketplaces can increase their breadth and
7	depth of product selection by offering products sold by third-party sellers.
8	212. Similarly, sellers prefer marketplaces where many potential customers already
9	shop. By reaching a larger customer base, sellers can increase sales.
10	213. Prospective entrants to both relevant markets face a chicken-and-egg problem:
11	they need to attract enough sellers to offer sufficient product selection to attract shoppers, but
12	they simultaneously also need to generate enough shopper traffic to attract those sellers.
13	
14	
15	This continuous loop creates a barrier to entry in both markets and accelerates
<u>16</u>	the growth of firms that can overcome it.
17

10	
11	Figure 17. Example of the "Chicken-and-Egg" Barrier to Entry.
12	Source:
<mark>13</mark>	214. Amazon leverages these network effects. At any given time, Amazon offers more
14	than different items for purchase on its online superstore. Sellers who buy marketplace
15	services from Amazon provide much of the product selection that helps Amazon attract and keep
16	its shoppers. As more shoppers turn to Amazon for its product selection, more sellers use its
17	platform to gain access to its ever-expanding consumer base, which attracts more shoppers, and
18	so on.
19	215. Amazon recognizes this feedback loop. An internal Amazon strategy document
20	states that
21	And Mr. Bezos
22	Amazon publicly states that its "wide selection is
23	made possible through independent sellers."
24	
	COMPLAINT - 67       FEDERAL TRADE COMMISSION         CASE NO. :cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222

## Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 72 of 172

1	216. The interplay between Amazon's shoppers and sellers increases barriers to new
2	entry and expansion in both relevant markets and limits existing rivals' ability to compete. In
3	this way, scale builds on itself, and is cumulative and self-reinforcing.
4	217. This feedback loop spins Amazon's "flywheel." Amazon publicly touts its
5	flywheel as a "virtuous cycle." But internally, Amazon
6	
7	
8	218. For example, Amazon strategically restricts how shoppers can purchase the
9	various services included in its Prime subscription, artificially increasing barriers to entry in the
10	online superstore and online marketplace services markets. Amazon has internally considered
11	
12	Amazon fuses together a wide assortment of unrelated
13	services ranging from streaming video, music, and gaming to prescription drugs and more to the
14	unlimited shipping service included in Prime—and through it, to Amazon's monopoly online
15	superstore.
16	219. Amazon does not let shoppers subscribe only to the unlimited shipping
17	component of Prime.
18	220. And while Amazon technically offers Prime Video on a standalone basis, Amazon
19	successfully uses dark patterns and other manipulative design techniques to thwart most shoppers
20	from actually being able to sign up for it.
21	221. Amazon's restrictive strategy of offering Prime services only on an all-or-nothing
22	basis means that shoppers who want any of those services must effectively buy all of them and
23	maintain a full Prime subscription. Amazon estimates that
24	
	COMPLAINT - 68 FEDERAL TRADE COMMISSION CASE NO:cv 600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222

2

limiting other superstores' ability to build a

(202) 326-2222

large customer base. 3 222. Amazon's restrictive all-or-nothing Prime strategy artificially heightens entry 4 5 barriers because rivals and potential rivals cannot compete for shoppers—including the 6 Prime subscribers described above-solely on the merits of their online superstores or marketplace services. Instead, they must enter multiple unrelated industries to attract Prime 7 8 subscribers away from Amazon or incur substantially increased costs to convince Prime 9 subscribers to sign up for a second shipping subscription or otherwise pay for shipping a second time. This substantial expense significantly constrains the number of firms who have any 10 11 meaningful chance to compete against Amazon and raises the costs of any that even try. This tactic blocks lower-priced rivals from competing head-to-head with Amazon to attract many 12 13 shoppers. Even firms that have introduced comparable subscription services at a fraction of the price have struggled to make serious inroads. Amazon's restrictive strategy artificially heightens 14 15 barriers to entry, such that an equally or even a more efficient or innovative rival would be unable to fully compete by offering a better online superstore or better online marketplace 16 services. 17 223. Amazon internally acknowledges that 18 19 20 21 22 224. But Amazon also recognizes that 23 24 So, Amazon deliberately restricts how shoppers can access various components of Prime, despite FEDERAL TRADE COMMISSION COMPLAINT - 69 CASE NO. : -cv-600 Pennsylvania Avenue, NW Washington, DC 20580 knowing that offering additional choices for consumers would lead to more competition and
 better prices.

225. This current restrictive structure of Prime reflects a deliberate strategy by Amazon 3 to artificially increase barriers to entry and competition. As one former Amazon executive 4 5 explained in recalling Amazon's motivation for adding non-shipping services to Prime, "[a]ny competitor might launch a Prime shipping clone, or they could potentially build a new Netflix-6 type service, but it was unlikely that any one of them would be able to do both." 7 8 226. In 2021, Amazon 9 10 11 12 13 14 15 As Mr. Bezos put it publicly, Amazon "monetize[s] [Prime Video] content in an unusual way .... When we win a 16 Golden Globe, it helps us sell more shoes." 17 18 19 20 To date, Amazon choosing to limit consumer choice and maintain artificially 21 22 heightened barriers to entry. 23 Amazon has also pursued a set of anticompetitive tactics-discussed further in 227. 24 Section VI, below-to unlawfully deny its rivals access to both shoppers and sellers, artificially FEDERAL TRADE COMMISSION COMPLAINT - 70 CASE NO. \_: \_\_-cv-\_\_ 600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222 stunting their growth by starving them of the feedback loops across the relevant markets that
 would benefit shoppers and sellers alike.

3	D. Direct Evidence Further Demonstrates Amazon's Monopoly Power
4	228. Direct evidence demonstrates that Amazon has monopoly power. Amazon's
5	ability to profitably do the following without losing sufficient business to change its behavior
6	illustrates its monopoly power: (a) degrade the quality of its shopper-facing search results and
7	
8	(b) degrade the quality of the shopping experience on Amazon by
9	
10	and (c) raise the prices it charges sellers to access the full suite of
11	Amazon's marketplace seller services and fulfillment services. In addition, Amazon's unlawful
12	conduct is further direct evidence confirming Amazon's monopoly power in both markets.
13	1. Amazon has

1	
2	
3	
4	Moreover, because Amazon's anti-
5	discounting conduct punishes sellers who offer lower prices at rival online stores with lower
6	fees, many sellers set their price on Amazon—high fees and all—as the price floor across the
7	internet.
8	237.
9	
10	According to public reports,
11	Amazon engineers found that "[w]hen sponsored ads were prominently displayed, there was a
12	small, statistically detectable short-term decline in the number of customers who ended up
13	making a purchase."
<mark>14</mark>	While fewer shoppers were finding what they wanted,
15	advertisements were making more money—"[a] lot of it."
16	238.
17	
18	
19	
20	Despite
GAG25530 III	degrading shoppers' experiences, Amazon continues to have double digit growth in overall sales,
21	
22	not losing meaningful numbers of shoppers to rivals.
23	239.
24	COMPLAINT - 74 FEDERAL TRADE COMMISSION
	CASE NO:cv 600 Pennsylvania Avenue, NW Washington, DC 20580
	(202) 326-2222

Amazon's ability to profitably worsen its service for customers is a hallmark of 3 240. 4 monopoly power.

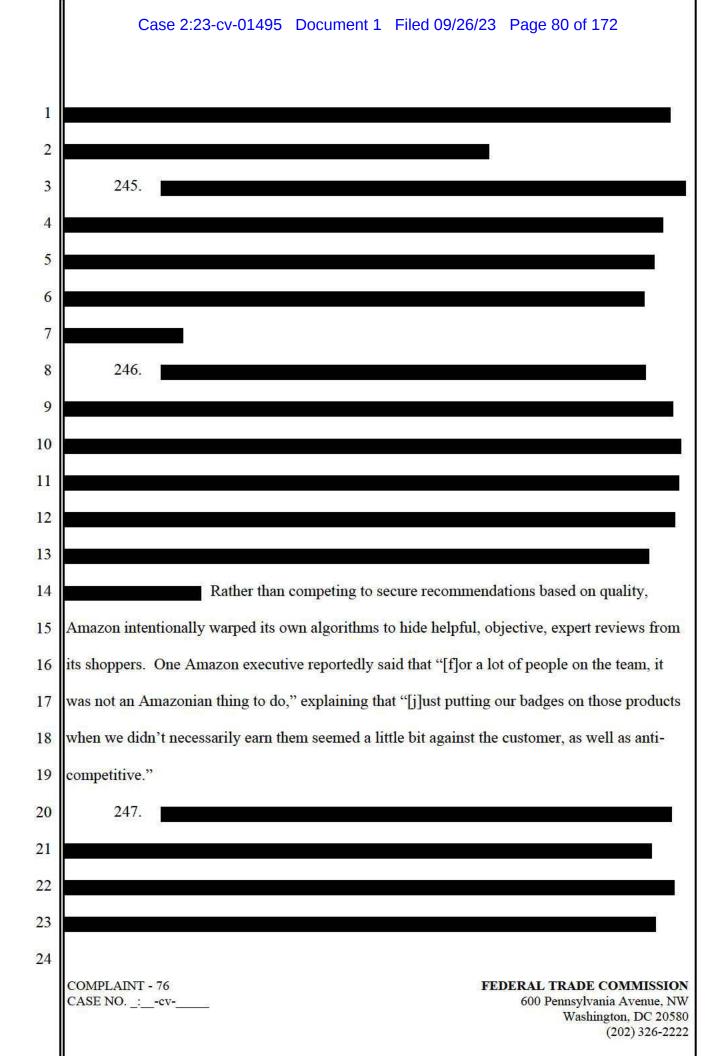

1

2

1

5	2. Amazon degrades its search quality by stacking the deck against
6	third-party competitors of Amazon's private label products
7	241. Amazon further degrades the quality of its search results by burying organic
8	content under recommendation widgets, such as the "expert recommendation" widget, which
9	display Amazon's private label products over other products sold on Amazon.
10	242. A recommendation widget is a discrete portion of Amazon's website or mobile
11	app that lets customers scroll through a set of recommended products. Previously, such widgets
12	were limited to displays like an area on a product's Detail Page indicating what "customers also
13	bought," or an area suggesting shoppers may want to replenish items they had previously
<mark>1</mark> 4	purchased, like paper towels.
15	
<mark>16</mark>	243. Amazon
17	
18	
19	
20	244.
21	
22	
23	
24	
	COMPLAINT - 75       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Wullimit - DO 200500

Washington, DC 20580 (202) 326-2222

248. In competitive markets, the possibility of losing business to rivals would tend to
pressure a company to create more value for its customers, shoppers and sellers alike. But
Amazon's unchecked dominance allows it to degrade its service without ceding—and indeed
while expanding—its business. The fact that Amazon's degradation of its search results through
biased widgets did not cause Amazon to lose sufficient business or to change its behavior further
demonstrates its monopoly power.

9

3.

1

2

#### Amazon increases prices to sellers without losing meaningful business

249. Amazon's monopoly power also allows it to charge higher prices and provide
 lower quality services to sellers. As explained in Part IV, above, Amazon charges sellers selling
 fees, referral fees, fulfillment fees, and advertising fees. The total price Amazon charges a seller
 has skyrocketed without a correspondingly large loss of business.

250. Before Amazon decided to prioritize advertisements as a way to generate revenue,
sellers were able to access prominent and valuable search page placement by paying just
Amazon's referral and sales fees. Now, advertised products on Amazon are 46 times more likely
to be clicked on when compared with products that are not advertised. Advertisements are now
no longer a discretionary purchase but instead a necessary cost of doing business. Therefore,
sellers must not only pay Amazon's referral fee but must also now pay for advertising in order to
reach shoppers.

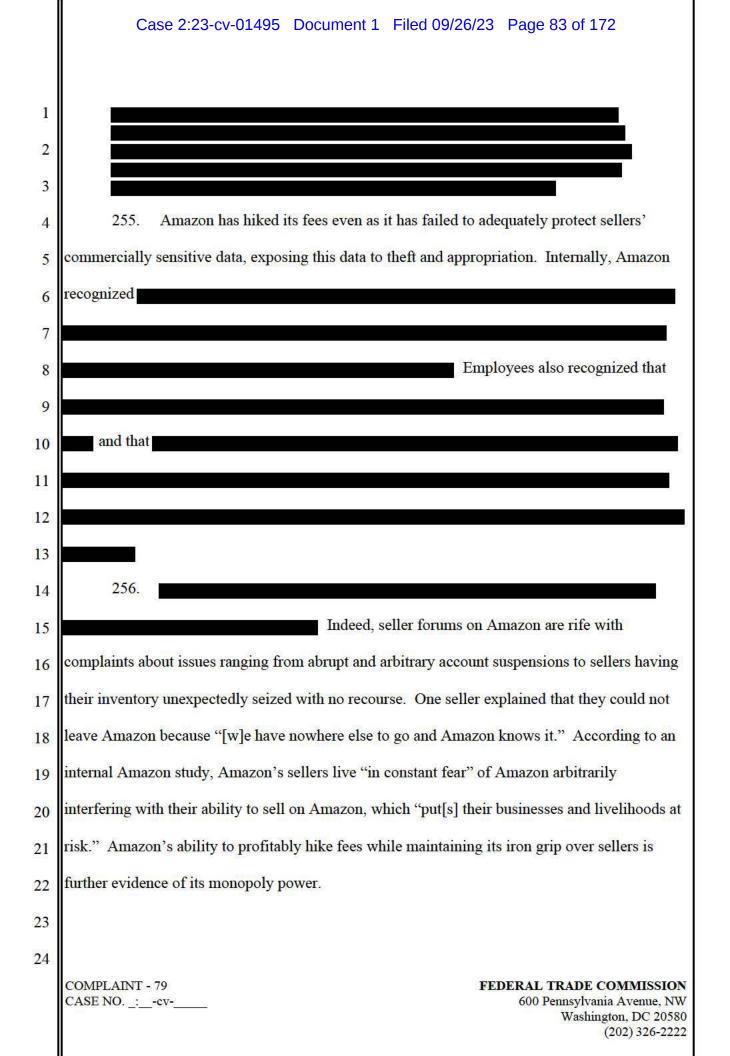

21 251. Amazon has also hiked average fulfillment fees to sellers, which jumped
22 approximately 30% between 2020 and 2022. Amazon has made these fees, too, a prerequisite to
23 being a successful seller on Amazon. As described in Part VI.B below, Amazon effectively

24

COMPLAINT - 77 CASE NO. \_:\_\_-cv-\_\_\_\_ FEDERAL TRADE COMMISSION 600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222 1 forces sellers to purchase its fulfillment services to access the full reach of Amazon's

2 marketplace services that Prime eligibility unlocks.

3	252. By effectively requiring sellers to pay for search placements through advertising
4	and for Prime's shipping costs through FBA, Amazon has dramatically increased the percentage
5	cut it takes out of seller revenues, also known as Amazon's "take rate." Amazon's average take
6	rate for sellers who use FBA
7	essentially the same services. Amazon now takes nearly one out of every two dollars of sales
8	from sellers who use its fulfillment services, many of whom are small businesses with already
9	thin margins. By comparison, <b>The fact that such</b>
10	low-margin sellers remain on Amazon even as Amazon takes an ever-greater cut of their
11	revenues shows Amazon's monopoly power.
12	253. Sellers note that because they depend on Amazon, they effectively have no choice
13	but to submit to Amazon's growing demands. As a third-party seller put it
14	The seller continued, stating that
15	Amazon's prices
16	According to a public article, another seller stated that "[f]or some products, we
17	realized that we need to pay for ads but we'll never profit at our current prices." As a result, that
18	seller had to raise prices to pay for advertising on Amazon.
19	254. Amazon also recognizes that sellers believe "that it has become more difficult
20	over time to be profitable on Amazon."
21	One of the only ways left for sellers
22	to eke out a profit is to raise the prices paid by shoppers. A seller succinctly explained this
23	dynamic:
24	

2

VI.

## AMAZON IS ENGAGED IN A COURSE OF CONDUCT THAT ILLEGALLY MAINTAINS ITS MONOPOLIES IN BOTH RELEVANT MARKETS

257. Amazon illegally maintains its monopolies through an interrelated course of
conduct that blocks competition. First, Amazon deploys a series of anticompetitive practices that
suppress price competition and push prices higher across much of the internet by creating an
artificial price floor and penalizing sellers that offer lower prices off Amazon. Second, Amazon
coerces sellers into using its fulfillment service to obtain Prime eligibility and successfully sell
on Amazon. Each of these tactics—independently and collectively—prevents Amazon's rivals
from gaining scale and maintains Amazon's monopolies.

10 258. Amazon first ensures that no other online rival can gain scale through offering prices lower than those listed on Amazon. Amazon accomplishes this anticompetitive goal 11 through an interwoven set of algorithmic and contractual tactics, all of which rely on Amazon's 12 13 massive web-crawling apparatus that constantly tracks online prices. Amazon's anti-discounting punishments tame price cutters into price followers, effectively halting real price competition. 14 This conduct imposes costs on shoppers and sellers alike. Shoppers pay inflated prices on and 15 16 off Amazon, as sellers must effectively submit to Amazon's high fees by raising prices even on 17 non-Amazon sites. Rivals no longer compete to offer sellers lower fees, since Amazon's anti-18 discounting conduct prevents sellers from passing those savings on to shoppers.

19 259. For sellers, Amazon conditions access to Prime eligibility on sellers' use of
20 Amazon's proprietary fulfillment service, FBA. Amazon's coercion makes it more difficult and
21 more expensive for sellers to sell on other marketplaces, which in turn makes it more difficult for
22 rivals to attract sellers and compete with Amazon on product selection. The result is a feedback
23 loop that continues to inhibit the growth of rivals and starve them of scale while maintaining and
24 expanding Amazon's dominant positions.

COMPLAINT - 80 CASE NO. \_:\_\_-cv-\_\_\_\_ FEDERAL TRADE COMMISSION 600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222 260. Each element of Amazon's course of conduct mutually reinforces its monopolies
 in both relevant markets. For example, Amazon's anti-discounting scheme stifles price
 competition. That same scheme also reinforces the exclusionary effects of Amazon's use of
 Prime eligibility to force sellers to use FBA, by making it even less profitable for sellers to sell
 on other marketplaces. This feedback loop fuels a flywheel of anticompetitive harm, amplifying
 the aggregate effects and further widening the gulf between Amazon and everyone else.

7 261. Because Amazon suppresses meaningful competition on price and product
8 selection, shoppers lack viable alternatives, further forcing sellers to submit to Amazon's
9 exclusionary tactics to reach those customers, and further allowing Amazon to accelerate and
10 expand its dominance. Together, Amazon's conduct blocks off competition, shopper traffic, and
11 seller business in the interrelated relevant markets.

12 13 A.

## Amazon Maintains Its Monopolies In Both Relevant Markets Through Exclusionary Anti-Discounting Conduct That Stifles Price Competition

14 262. A core Amazon strategy is to limit one of the most fundamental avenues of
15 competition: price competition. Amazon understands the importance of maintaining the
16 *perception* among shoppers that it has the lowest prices. But in reality, Amazon relentlessly
17 stifles actual price competition by punishing sellers who offer lower prices anywhere other than
18 Amazon and disciplining rivals that undercut Amazon's prices.

263. Amazon uses a variety of tactics to execute its anti-discounting strategy. At the
foundation is Amazon's sprawling price-surveillance group, the

> Washington, DC 20580 (202) 326-2222

Amazon's Marketplace. Amazon also deters rivals from even attempting to compete with
 Amazon's first-party Retail business on price by ensuring that rivals' price cuts do not result in
 greater scale, only lower margins.

264. Combined, Amazon's conduct quashes one of the most direct ways to compete
with Amazon in both relevant markets: by offering lower prices. In an open, competitive
environment, rival online superstores could attract more business by offering shoppers lower
prices, and rival online marketplaces could attract sellers by charging them lower fees, allowing
sellers to pass those savings on to shoppers via lower prices. Amazon suppresses this price
competition by wielding its monopoly power to prevent sellers and retailers from offering lower
prices off Amazon.

11 265. Without the ability to attract shoppers or sellers through lower prices, rivals are unable to gain a critical mass of either shoppers or sellers despite needing both to compete 12 against Amazon. Further, by punishing sellers when there are lower prices off Amazon and 13 disciplining rivals that try to compete on price, Amazon teaches shoppers not to look for lower 14 15 prices off Amazon. Less comparison shopping again hinders rivals from gaining a larger 16 consumer base. Amazon's anti-discounting strategy therefore denies rivals the ability to gain scale, cements Amazon's dominance in both relevant markets, and ultimately keeps prices higher 17 than they would be in a competitive market. 18

19 20

21

22

# 1. Amazon engages in price surveillance to support its anti-discounting scheme

5	
6	
7	
8	268. Amazon
9	
10	
11	
12	2. Amazon maintains its monopolies by punishing third-party sellers
13	when Amazon detects lower prices on other online stores
14	269. Using its vast surveillance network, Amazon systematically punishes sellers when
15	Amazon detects a lower price on other online stores. Amazon does this in two ways. One way
16	Amazon punishes sellers is by disqualifying a seller's offer from appearing in the Buy Box when
17	Amazon finds a lower price on another online store for an item being sold by a seller on
18	Amazon. For many sellers, losing the Buy Box—and even the ability to qualify for the Buy
19	Box—is an existential threat to their business. Amazon has amassed and maintains a huge
20	shopper base, making Amazon a vital sales channel for many sellers. The second way Amazon
21	punishes sellers is by imposing contractual obligations on certain important sellers, backed up
22	with the threat of even stronger penalties, including total banishment from Amazon's
23	Marketplace.
24	
	COMPLAINT - 83       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580

Washington, DC 20580 (202) 326-2222

270. As a result of Amazon's threats and punishments, even rival platforms that charge 1 sellers less than Amazon for marketplace services would not be able to draw shoppers through 2 lower prices. 3

271. Amazon not only suppresses the ability of sellers and retailers to offer lower 4 prices elsewhere, but its conduct effectively *elevates* prices even off Amazon. Because Amazon 5 has steadily hiked the fees it charges sellers while also prohibiting them from discounting on 6 other websites, sellers must often use their inflated Amazon prices as an artificial price floor 7 8 everywhere. As a result, Amazon's conduct causes online shoppers to face artificially higher prices even when shopping somewhere other than Amazon. 9

10

11

#### Amazon penalizes sellers when Amazon finds lower prices off a. Amazon

272. Amazon's anti-discounting strategy has taken several forms. Amazon originally 12 included a clause in its Business Solutions Agreement—a contract every seller must agree to— 13 that explicitly prohibited sellers from offering lower prices elsewhere. From at least as early as 14 15 until March 2019, this contract required each seller to "maintain [price] parity" between 16 Amazon and other online sales channels. This meant that a seller could not offer lower prices on other online stores without breaching their Amazon contract, even when their selling costs were 17 lower on those stores. 18

19 273. After European competition authorities launched multiple investigations into 20 Amazon's price parity clauses, Amazon dropped this requirement in Europe in August 2013.

21 274. In December 2018, U.S. Senator Richard Blumenthal sent public letters to the 22 Federal Trade Commission and the U.S. Department of Justice expressing "deep[] concern[] that the price parity provisions in Amazon's contracts with third-party sellers could stifle market 23 24 competition and artificially inflate prices on consumer goods." Three months later, Amazon **COMPLAINT - 84** FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_ 600 Pennsylvania Avenue, NW Washington, DC 20580

(202) 326-2222

1	quietly stopped its practice of applying this particular contractual price parity provision to all
2	sellers.

3	275.	Despite making this particular change, Amazon never abandoned its strategy of
4	preventing se	llers from offering lower prices elsewhere. Instead, Amazon
5		

6	
7	276. An internal Amazon document written weeks after Amazon dropped its
8	contractual price parity requirement acknowledged that Amazon intended to use to
9	enforce its "expectations and policies," which "ha[d] not changed." Whether done contractually
10	or algorithmically, Amazon requires sellers to keep prices off Amazon as high or higher than
11	prices on Amazon. Amazon uses
12	
13	"not only trivial but a trick and an attempt to garner goodwill with policymakers
14	amid increasing competition concerns."
15	277.
16	
17	If Amazon disqualifies every
18	offer for a given product from winning the Buy Box, Amazon removes the Buy Box itself from
19	the product's Detail Page.
20	278.

1	(b)
2	(c) and
3	(d)
4	284.
5	Amazon itself recognizes that removing a seller from the Buy Box causes
6	their sales to "tank." Offers outside of the Buy Box comprise less than <b>●</b> % of all purchases on
7	Amazon.
8	285. Amazon's penalties effectively deter sellers from offering prices elsewhere that
9	are lower than their prices on Amazon, even where their costs are lower through other online
10	sales channels. That in turn limits the ability of other online superstores to offer prices lower
11	than those on Amazon, hindering the growth of would-be rivals and denying them the scale
12	necessary to compete.
13	b. Amazon continues to contractually prohibit its most important
14	sellers from discounting elsewhere
15	286. Amazon places additional limits on certain sellers' ability to sell products at lower
16	prices on other online stores. These restrictions are embedded in the "Amazon's Standards for
17	Brands" ("ASB") program.
18	287. Amazon applies ASB to brands, brand licensees, and brand representatives that
19	use Amazon's Marketplace ("ASB sellers"), regardless of whether their brand is a long-
20	established household name or an upstart few people would recognize.
21	
22	288. ASB sellers are an especially important type of seller to Amazon for two reasons.
23	First, ASB sellers constitute
24	
	COMPLAINT - 87       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222

	Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 92 of 172
1	In 2021, % of Amazon Marketplace sales were by ASB sellers, and Amazon
2	projected they would sell more than <b>and the sell of products on Amazon in 2022</b> .
3	289. Second, because of their close relationship with the brands they sell, ASB sellers
4	have more influence over brand prices and selection across channels than "resellers," which lack
5	such a relationship. As a founding member of the team responsible for ASB explained,
6	
7	
8	290. Amazon implemented ASB in September 2018 through an amendment to the
9	Business Solutions Agreement. All sellers, including ASB sellers, must agree to Amazon's
10	Business Solutions Agreement in order to sell on Amazon's Marketplace. The ASB restrictions
11	are therefore binding contractual obligations that Amazon imposes on ASB sellers.
12	291. Through ASB,

6	303.
7	
8	
9	
10	304. ASB—are thus additional elements working across
11	Amazon's business in tandem with Amazon's other strategies that punish off-Amazon
12	discounting, stifle competition, impede the growth of potential competitors, hike prices, and
13	degrade quality for consumers in the relevant markets.
14	c. Amazon's anti-discounting strategy prevents rivals and sellers
15	from offering lower prices and deprives rivals of scale necessary
16	to compete
17	305. By suppressing competition in the online superstore and marketplace services
18	markets, Amazon's anti-discounting strategy artificially inflates prices. Shoppers and sellers pay
19	more, and Amazon reaps the benefits.
20	306. Amazon's one-two punch of high fees and seller threats forces sellers to use their
21	inflated Amazon prices as a price floor everywhere else they sell online. As a result of
22	Amazon's conduct, shoppers often have no choice but to pay at least the price in Amazon's Buy
23	Box even when they buy online somewhere other than Amazon.
24	COMPLAINT - 91       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222

307. Sellers generally price their goods to at least cover their costs, including fees 1 charged by online marketplace services providers (such as those discussed in Part IV, above). Thus, the seller's shopper-facing price depends on the amount of fees charged by different 3 marketplaces. 4

308. 5 As discussed in Part V.D.3, above, the cost of doing business is higher on Amazon than on other marketplaces—and Amazon has steadily hiked the fees it charges sellers, 6

7

8 309. Because Amazon has steeply raised its fees, sellers need to charge higher prices 9 on Amazon than they would on a less-costly marketplace to make the same per-unit profit. Amazon's high fees should present other online superstores with an opportunity that would make 10 shoppers, sellers, and themselves better off: if those superstores can offer sellers lower fees, 11 sellers could offer shoppers lower prices while making the same or a higher profit margin, which 12 13 should cause shoppers and sellers alike to flock to the less-costly online store.

310. 14 Amazon has destroyed this competitive dynamic by algorithmically forcing sellers to ensure that their prices off Amazon are no lower than their prices on Amazon, 15 16 regardless of the relative costs. Similar anticompetitive effects flow from ASB, which 17 contractually prevents brands from offering lower prices elsewhere online even when it would be profitable for them to do so, including on their own websites. 18

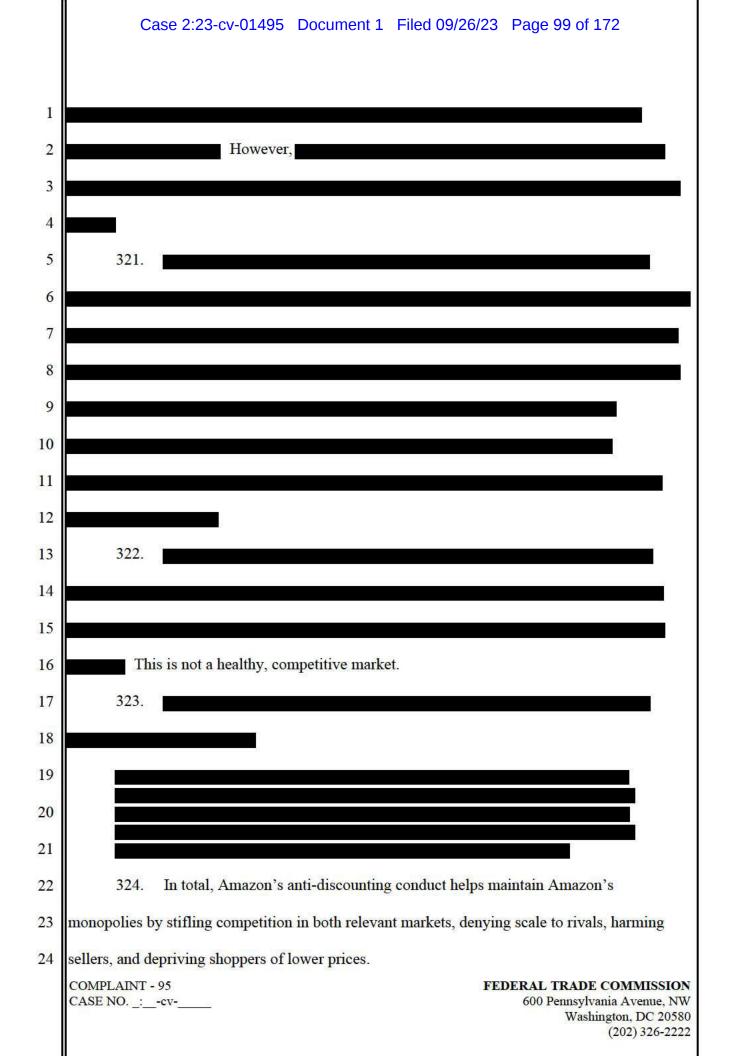

19	311. Amazon internally recognizes that
20	
21	
22	
23	
24	
	COMPLAINT - 92       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580

	Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 97 of 172
1	312.
2	
3	For instance, one seller told Amazon that
4	
5	
6	Sellers have also complained to Amazon
7	"that [Buy Box disqualification] encourages Sellers to raise their prices on competitor websites."
8	313. One Amazon seller
9	
10	
11	314. Another seller
12	
13	
14	315. Amazon understands that its anti-discounting strategy generally does not have the
15	effect of lowering prices on Amazon because sellers must pay the high fees charged by Amazon.
16	A 2017 Amazon internal memo observed that Buy Box disqualification "has not led Sellers to
17	lower their prices" and "has not motivated Sellers to reduce prices."
18	"it has become
19	more difficult over time [for sellers] to be profitable on Amazon." As discussed in Part V.D.3,
20	above, the fees Amazon charges sellers have ballooned
21 22	316. The primary and intended effect of Amazon's anti-discounting strategy is that
22	sellers do not offer lower prices off Amazon even if other online marketplaces offer sellers lower
23	costs.
<u>~</u> r	COMPLAINT - 93 CASE NO:cv 600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222

Ш

1	317. This effect is intensified for sellers subject to ASB. While Amazon's algorithmic
2	anti-discounting punishment focuses on individual products, Amazon's enforcement of ASB
3	threatens an ASB seller's ability to sell anything at all as a third-party seller on Amazon's
4	Marketplace. ASB's threatened contractual punishments could therefore effectively cut off a
5	huge channel for sellers. In that way, ASB is broader in scope than any particular instance of
6	Amazon's algorithmic third-party punishment, making it even more likely that Amazon's
7	punitive program deeply chills discounting by ASB sellers off Amazon.
8	318.
9	
10	
11	
12	The force and fear of Amazon's tactics are so strong that actual punishment is
13	often not necessary. The threat alone can be enough.
14	319. For example,
15	
16	
17	Amazon's anti-discounting punishments also limit the extent to which sellers sell on other online
18	marketplaces, where sellers can control the final prices offered to customers.
19	
20	
21	
22	
23	320. Amazon's anti-discounting conduct reverberates throughout both relevant markets
24	because of Amazon's dominance in each market. For example,
	COMPLAINT - 94       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222

3.

## Amazon maintains its monopolies by suppressing price competition with its first-party anti-discounting algorithm

3 325. For Retail products that Amazon prices and sells itself, Amazon deploys a similar
4 anti-discounting program that it implements through another pricing algorithm. While the exact
5 mechanism differs from the mechanisms Amazon uses to punish sellers, the means, motive, and
6 effects are all the same. Amazon uses its extensive surveillance network to block price
7 competition by detecting and deterring discounting, artificially inflating prices on and off
8 Amazon, and depriving rivals of the ability to gain scale by offering lower prices.

9

10

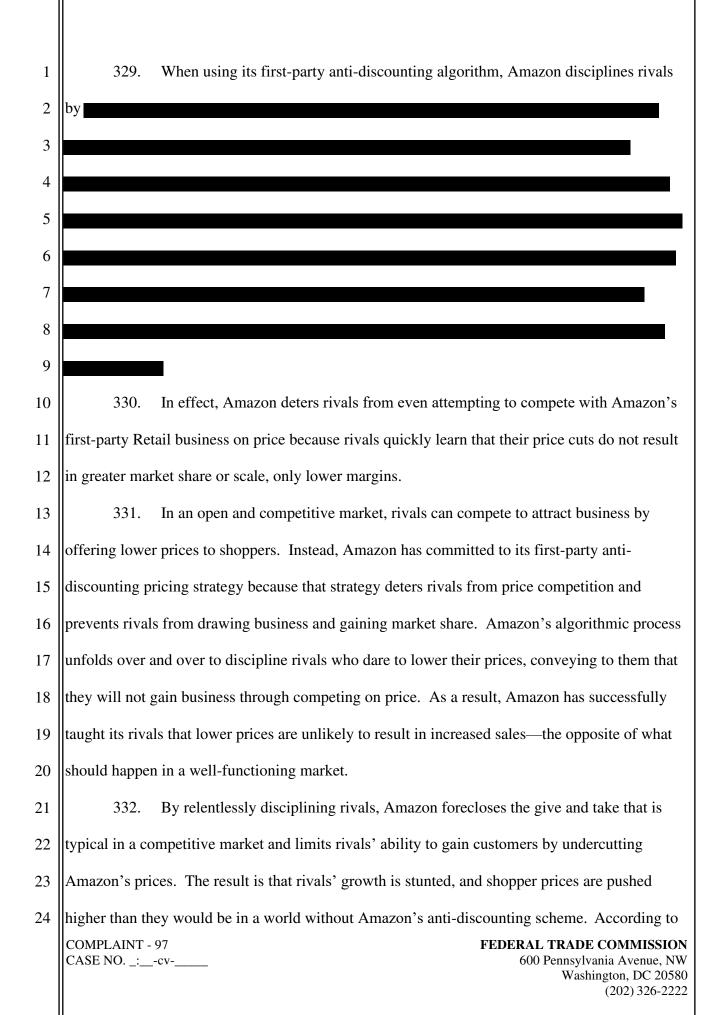

. -

## a. Amazon's first-party anti-discounting algorithm is designed to discipline rivals from lowering their prices

326. Amazon designed and implemented a first-party anti-discounting algorithm to
 deter other online stores from offering lower prices than those of Amazon's Retail products.
 Amazon recognizes the importance of maintaining the *perception* that it has lower prices than
 competitors. Behind closed doors, however, Amazon executives actively

Ш

1	Amazon's first-party anti-discounting algorithm has "work[ed]"
2	
3	b. Amazon's first-party anti-discounting algorithm has stopped
4	other online stores from competing through offering lower prices
5	333. Though the different elements of Amazon's anti-discounting strategy often work
6	in tandem to stifle competition (as discussed in Part VI.A.4, below), Amazon's first-party anti-
7	discounting algorithm has, on its own, deterred other online stores from competing through
8	lower prices.
9	334. For example, Amazon's first-party anti-discounting scheme successfully deterred
10	price competition in 2017 when introduced a second se
11	
12	
13	
14	
15	
16	335. Amazon concluded that its first-party anti-discounting strategy ultimately helped
17	induce to stop competing on price through its pickup discount program. In an internal
18	planning and strategy document, Amazon determined that its first-party anti-discounting
19	algorithm created a
20	
21	336. In response to Amazon's anti-discounting conduct,
22	
23	Amazon estimated that

Ш

1	337. At one point in 2019, after enduring years of Amazon's algorithmic disciplining,
2	
3	
4	
5	
6	
7	
8	
9	4. Amazon combines its various anti-discounting programs to maximize
10	their collective anticompetitive effect
11	338. Amazon uses all of its various anti-discounting programs—and the combined
12	power of its Marketplace and Retail arms—to limit price competition and comparison shopping
13	for the hundreds of billions of dollars in goods sold annually in the relevant markets. This
14	suppression of price competition and comparison shopping also artificially contributes to
15	converting more shoppers into Prime subscribers.
16	339. Amazon's seller-disciplining tactics and first-party anti-discounting algorithm are
17	each powerful on their own (as explained in Parts VI.A.2.c and VI.A.3.b, respectively), but the
18	whole of their combined anticompetitive impact is significantly greater than the sum of their
19	individual effects.
20	340. In 2016, Amazon used various elements of its anti-discounting strategy to
21	hamstring a new online superstore that planned to compete against Amazon by
22	offering shoppers and sellers lower prices. Amazon feared that
23	
24	Amazon predicted that

COMPLAINT - 102 CASE NO. \_:\_\_-cv-\_\_\_\_

FEDERAL TRADE COMMISSION 600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222 353. Amazon exploits sellers' demand for access to Prime eligibility by generally
 conditioning that access on use of Amazon's proprietary fulfillment service, FBA, even though
 other fulfillment options could provide comparable or better service.

354. Sellers who use FBA must relinquish physical control over their products and
place them in Amazon's fulfillment centers, which principally can be used to serve only Amazon
customers. As a result, a seller who wants to sell both to Amazon and non-Amazon customers
must maintain a separate supply of inventory dedicated exclusively to non-Amazon customers
and engage a separate fulfillment provider to serve those non-Amazon customers.

9 355. Absent Amazon's restrictions, many sellers would prefer to use an independent fulfillment provider that would allow them to more easily fulfill orders placed on both Amazon 10 and non-Amazon marketplaces. That, in turn, would increase the ability of rival online 11 marketplace services providers to compete for sellers' business and increase the ability of rival 12 online superstores with marketplaces to compete by offering greater product selection to 13 shoppers. Conditioning a product's Prime eligibility on its seller's use of FBA maintains 14 Amazon's monopoly in both relevant markets in two main ways. First, it raises the cost of 15 16 multihoming, forcing sellers who sell through more than one online superstore to bear the 17 increased costs of using multiple fulfillment providers. Second, it forecloses independent fulfillment providers from competing to fulfill Prime orders on Amazon, depriving those 18 independent providers of an important source of business and scale needed to build out an 19 20efficient fulfillment network. Because fewer sellers can cost-effectively multihome, rivals and 21 potential rivals to Amazon are deprived of product selection.

(202) 326-2222

357. 1 Amazon's conduct constrains its rivals' ability to compete, harming shoppers and 2 competition in both relevant markets and entrenching Amazon's monopoly. By making it more expensive for sellers to sell the same product on multiple online superstores and marketplaces, 3 Amazon artificially limits rivals' ability to gain sufficient growth, momentum, and scale to draw 4 a critical mass of shoppers and meaningfully compete. 5

6	1. Sellers who forgo Prime eligibility effectively disappear from		
7	Amazon's storefront		
8	358. In 2021, over U.S. consumers, or approximately % of U.S.		
9	households, subscribed to Amazon Prime. Prime subscribers account for an overwhelming share		
10	of all purchases on Amazon—more than $\blacksquare$ % of all purchases by dollar value in 2021. Prime		
11	subscribers also disproportionately purchase Prime-eligible offers. For example, more than $\blacksquare\%$		
12	of the items U.S. Prime subscribers purchased in the third quarter of 2021 were Prime eligible.		
13	In the first quarter of 2021, U.S. Prime subscribers bought nearly Prime-eligible products		
14	for every one non-Prime-eligible product they purchased.		
15	359. For many sellers, having Prime-eligible products is a prerequisite to making		
16	significant sales on Amazon. The Prime designation makes sellers' products more		
17	discoverable—and therefore likely to be purchased—		
18			
19			
20			
21			
22	360. Overall, Prime eligibility alone regularly a seller's sales on Amazon.		
23	Meanwhile, sellers who forgo Prime eligibility effectively disappear from Amazon's storefront.		
24	Amazon relegates non-Prime-eligible products to a near-invisible, second-rate version of

	COMPLAINT - 105       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222

# 3. By forcing sellers to use FBA for their products to be Prime eligible, Amazon raises sellers' costs of selling on multiple marketplaces, stifling competition in both relevant markets

364. By tying Prime eligibility to FBA, Amazon restricts sellers' choices about which 4 5 fulfillment provider they use, stifling multihoming and thus harming competition in both the online marketplace services and online superstore markets. Many sellers would prefer to use a 6 single fulfillment network for all their online orders, on and off Amazon. Indeed, as Amazon's 7 8 Vice President of Worldwide Selling Partner Services reportedly recognized recently, "[a] seller 9 doesn't want to have two sets of supply-chain services, one that's for Amazon and one that's for someone else." By forcing sellers to use FBA for their products to be Prime eligible, Amazon 10 functionally forecloses that option for sellers. 11

365. Without Amazon's coercion, sellers could more easily offer their products to
shoppers via multiple outlets, including other online superstores and marketplaces. They could
also use a single fulfillment provider of their choice and pass associated savings on to their
customers across all online sales channels, including Amazon. Amazon's rivals, in turn, could
gain scale by attracting new sellers to their marketplaces and offering new selection to shoppers.
Amazon fears that world, and so it uses Prime eligibility to foreclose it from coming to pass.

18 366. Amazon's conduct blocks competition for sellers and the ability of online 19 superstores to gain those sellers' product selection in two interrelated ways. First, Amazon 20 forces sellers who want to make Prime-eligible offers on Amazon and to sell through other sales 21 channels to use two duplicative fulfillment operations instead of saving costs by consolidating 22 inventory with a single fulfillment provider. Second, Amazon forecloses a significant volume of 23 orders from independent fulfillment providers by making FBA effectively the only fulfillment 24 option available for Prime-eligible orders. By essentially forcing sellers to use FBA, Amazon FEDERAL TRADE COMMISSION **COMPLAINT - 106** CASE NO. \_:\_\_-cv-\_ 600 Pennsylvania Avenue, NW

### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 111 of 172

deprives independent fulfillment companies of an important source of scale that is necessary to 1 develop efficient fulfillment networks. Sellers are less likely to commit inventory to independent 2 fulfillment providers that do not have the scale to efficiently serve their needs, and without cost 3 effective and efficient fulfillment operations, sellers are less likely to sell across multiple online 4 5 marketplaces. Thus, Amazon's tying of Prime eligibility to FBA usage raises the cost of multihoming, making it harder and more expensive for sellers to sell on alternative online 6 marketplaces and more difficult for online superstores to attract sellers and expand their product 7 8 selection.

9 367. These twin mechanisms harm competition in the online retail fulfillment services market while also stifling competition in both relevant markets. They do so by raising the costs 10 Amazon sellers must incur to do business with other online superstores and online marketplace 11 services providers. Some sellers cope by simply not selling anywhere other than Amazon. 12 Others are pressured to pass on higher costs in the form of higher prices, slower shipping speeds, 13 or both. As a result, by tying Prime eligibility to FBA, Amazon reduces product selection 14 available to Amazon's rivals, thereby degrading quality for shoppers and raising sellers' costs, 15 16 which can lead to price increases for shoppers.

17

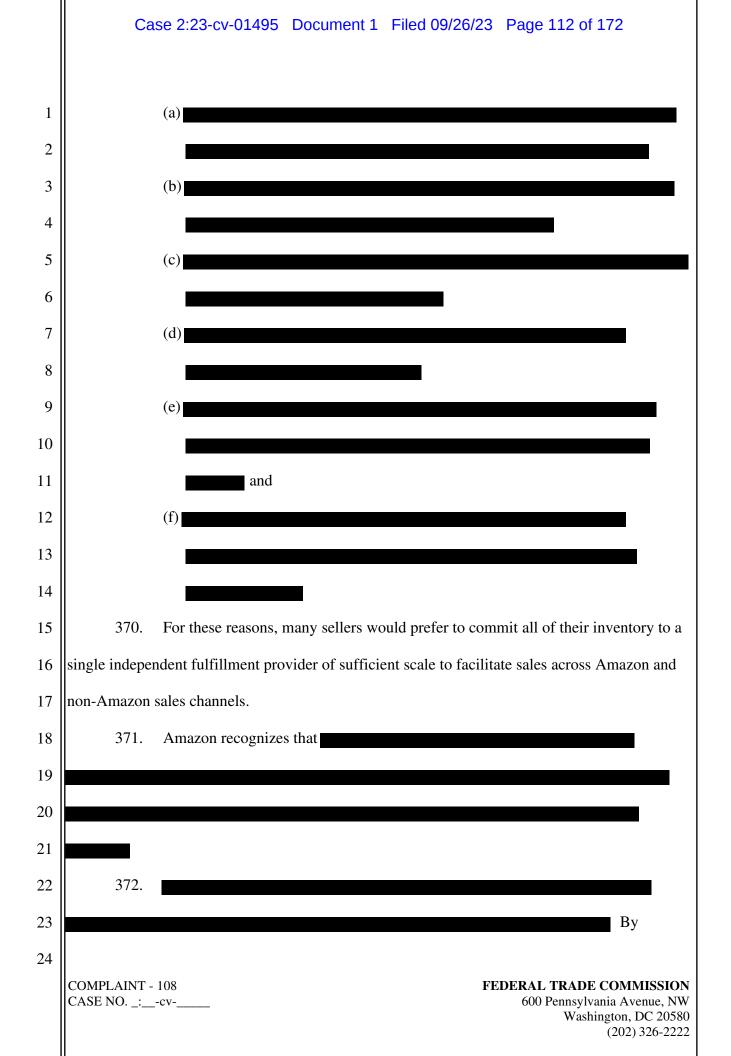

18

# a. Amazon raises sellers' costs by forcing them to split their inventory to sell across multiple sales channels

368. Because Amazon forces sellers to use FBA to receive Prime eligibility, sellers
 who do not want to sell solely through Amazon must split their physical inventory by putting
 inventory for Amazon orders into FBA and inventory for non-Amazon orders in a different
 fulfillment network, such as one operated by an independent fulfillment provider.

23 369. Splitting inventory among multiple fulfillment networks raises the costs for sellers
 24 to offer products for sale through multiple sales channels by, among other things:
 COMPLAINT - 107 FEDERAL TRADE COMMISSION

CASE NO. \_:\_\_-cv-\_\_\_\_

foreclosing these sellers from using a single independent fulfillment provider, Amazon
 effectively forces these sellers to sell exclusively on Amazon.

3 373. For sellers who do offer their products across multiple online sales channels,
4 Amazon's tying Prime eligibility to FBA imposes unnecessary and additional costs that can lead
5 to higher product prices, reduced seller profitability, and fewer sales. This, in turn, reduces
6 sellers' incentives to offer their products and invest resources into selling on multiple online
7 superstores by purchasing services from multiple online marketplaces.

8 374. Because most sellers must sell Prime-eligible products on Amazon to be
9 successful, tying Prime eligibility to FBA increases sellers' costs by forcing them to use multiple
10 fulfillment providers to sell off Amazon. Amazon's conduct hinders other online marketplaces'
11 ability to attract sellers and impedes online superstores' ability to offer enough product selection
12 to compete meaningfully with Amazon. This conduct also artificially contributes to converting
13 more shoppers into Prime subscribers.

14

15

# b. Forcing sellers to use FBA to obtain Prime eligibility impedes competition and the growth of independent fulfillment providers

375. Amazon's coercive conduct that forces sellers to use FBA forecloses significant
volumes of business from independent fulfillment providers that could facilitate seller
multihoming across multiple online marketplaces and superstores.

376. By forcing sellers to purchase FBA to ensure that their products are Prime
 eligible, Amazon artificially walls off a massive volume of Prime-eligible orders from
 competition, instead funneling it solely into FBA. In so doing, Amazon harms competition in the
 market for online retail fulfillment services. Amazon's foreclosure of competition in the online
 retail fulfillment services market helps maintain Amazon's monopolies in the online marketplace
 services and online superstore markets.
 COMPLAINT - 109

CASE NO. \_:\_\_-cv-\_\_\_\_

377. Online retail fulfillment services include storing, picking (i.e., retrieving from
 storage), packaging, and preparing items purchased by shoppers online for delivery. Sellers
 purchase online retail fulfillment services to complete online orders placed by shoppers.

378. Online retail fulfillment services are discrete and separate from online
marketplace services. Online marketplace services enable sellers to offer items for sale to online
shoppers, whereas online retail fulfillment services are focused on physically storing and
preparing items for delivery to shoppers.

8 379. These services are offered to sellers at distinct prices and pricing structures
9 compared to online marketplace services. For example, Amazon charges sellers that use its
10 "Professional" plan to access its Marketplace on a monthly basis whether or not any sale is
11 made. But Amazon's fulfillment fees are based on the item's size and weight, as well as how
12 long Amazon had to store it before fulfilling the order.

13 380. Demand for online retail fulfillment services is separate from demand for online
14 marketplace services. Sellers often choose to purchase these services separately. And online
15 retail fulfillment services are frequently provided by distinct suppliers.

381. Providers of online retail fulfillment services must have fulfillment facilities in
the United States to timely and reliably serve U.S.-based shoppers. Online retail fulfillment
services providers that do not have U.S. fulfillment facilities generally are not substitutable for
U.S. online retail fulfillment providers.

382. Amazon, through FBA, is by far the largest U.S. supplier of online retail
fulfillment services. In 2020, Amazon fulfilled orders for over items using more than
200 U.S. fulfillment centers.

383. As the sheer size of Amazon's fulfillment operations suggests, the online retail
 fulfillment services market benefits from economies of scale. Online retail fulfillment service
 COMPLAINT - 110

### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 115 of 172

providers can ship products faster and cheaper when they can place products closer to the end consumer by having a large network of fulfillment centers. These speed and cost savings may be
 shared with shoppers via faster deliveries and cheaper products.

4	384. Amazon recognizes that		
5	Amazon measured		
6			
7			
8	385. Independent fulfillment providers, too, benefit from large fulfillment volumes that		
9	can help them scale and reduce costs. But by tying Prime eligibility to FBA use, Amazon		
10	effectively removes the opportunity for online fulfillment providers to compete for Prime order		
11	volumes—locking in those volumes for FBA alone.		
12	386. This foreclosure denies independent fulfillment providers an important source of		
13	scale that may contribute to their growth, allow them to take advantage of volume-based cost		
14	savings, and help them build the infrastructure necessary to efficiently fulfill orders for products		
15	sold online.		
16	387. Unlike Amazon's FBA, independent fulfillment providers are agnostic about the		
17	channel from which sales originate. These independent logistics firms let sellers offer products		
18	seamlessly across multiple marketplaces and online superstores.		
19	388. In contrast to independent fulfillment providers, Amazon's FBA service only		
20	fulfills orders placed on Amazon's Marketplace. Sellers cannot use FBA to fulfill orders off		
21	Amazon. To fulfill orders off Amazon, sellers can pay an additional fee for a separate Amazon		
22	fulfillment service.		
23			
24			
	COMPLAINT - 111       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580		

(202) 326-2222

1	389. In a competitive world, the growth of independent fulfillment providers could
2	erode Amazon's monopoly power in the relevant markets. Successful independent fulfillment
3	providers could foster competition among marketplaces by breaking down the barrier to
4	efficiently selling across marketplaces. That, in turn, could open up rival online superstores' and
5	online marketplace services providers' ability to attract sellers' business and product selection.
6	390. Amazon's former head of Global Fulfillment Services internally voiced
7	
8	Another executive
9	
10	
11	
12	
13	391. Following conversations with sellers, other Amazon executives confirmed
14	
15	Amazon's
16	former head of Global Fulfillment Services
17	
18	392. Prime-eligible fulfillment volumes are significant. In 2020, FBA fulfilled more
19	than units, which, if shipped individually, would account for nearly boxes for
20	every person in the United States. Conditioning Prime eligibility on FBA enrollment has locked
21	in massive volumes of shipments exclusively to Amazon, allowing it to scale its fulfillment
22	network into the behemoth it is today.
23	393. Independent fulfillment providers' operations remain far smaller than FBA.
24	These providers fulfill orders for only a few thousand, and often only a few hundred, sellers.
	COMPLAINT - 112       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222

Had independent fulfillment providers been able to compete for Amazon order volumes, they
 could have won significant business from Amazon's third-party sellers.

3 394. Amazon ensures that independent fulfillment providers will stay artificially small
4 by requiring that sellers who want Prime-eligible products use FBA for fulfillment. As a result,
5 Amazon makes some providers' services comparatively more expensive because they are unable
6 to take full advantage of the economies of scale. Amazon locks in the scale for itself through
7 tying Prime eligibility to use of FBA, and sellers have fewer choices for fulfillment providers.

c. Amazon unlawfully maintains its monopolies by conditioning Prime eligibility on sellers' use of FBA

395. Through these twin mechanisms—(1) raising the costs for sellers of using
multiple sales channels and (2) artificially stunting the growth of independent fulfillment
providers—Amazon maintains its monopolies in the online superstore and online marketplace
services markets by denying rivals the ability to gain the scale needed to compete meaningfully
against Amazon.

Some sellers on Amazon that might otherwise also sell off
Amazon choose not to due to the associated logistics and administrative costs, while other sellers
offer only certain products to other online stores. Sellers must effectively accept Amazon's
burdensome terms, and Amazon's rivals are thus deprived of the opportunity to meaningfully
compete for sellers. By tying a product's Prime eligibility to the seller's use of FBA for that
product, Amazon suppresses competition for sellers' product selection and for online shoppers.

COMPLAINT - 113 CASE NO. \_:\_\_-cv-\_\_\_

396.

Ι

1	4. Amazon's use of Seller Fulfilled Prime underscores the harms to
2	competition caused by Amazon's conditioning Prime eligibility on use
3	of FBA
4	397. Amazon's fear of a world in which unrestricted seller choice leads to increased
5	competition is grounded in experience. For a period of time, Amazon temporarily allowed
6	sellers to use their own fulfillment solution for Prime-eligible orders. When Amazon realized it
7	had lowered a barrier to competition, it quickly reversed course.
8	398. In 2015, Amazon briefly experimented with allowing a small subset of sellers to
9	fulfill Prime-eligible orders without using FBA. That year, Amazon launched a program it later
10	called Seller Fulfilled Prime ("SFP"), which was
11	SFP let
12	sellers make Prime-eligible offers without purchasing FBA services. Though SFP was popular
13	with sellers, Amazon shuttered SFP enrollment in 2019
14	
15	399. From SFP's launch, Amazon
16	
17	
18	400. SFP was an immediate hit among sellers. In the program's first full year, Amazon
19	onboarded more than sellers. At its peak, approximately sellers had enrolled in
20	SFP. Yet even these enrollment numbers understate seller demand for SFP, because Amazon
21	
22	401. Sellers enrolled in SFP
23	
24	
	COMPLAINT - 114       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222

1	402. Mr. Bezos highlighted SFP in his 2015 letter to shareholders, explaining that
2	Amazon had "invited sellers to be part of the Prime program and ship their own orders at
3	Prime speed directly." Mr. Bezos described SFP as a win-win for sellers and shoppers, writing,
4	"[t]hose [enrolled] sellers have already seen a significant bump in sales, and the program has led
5	to hundreds of thousands of additional items that are available to Prime customers via free two-
6	day or next-day shipping." Though SFP was benefitting at least some shoppers and sellers,

24	
	COMPLAINT - 115       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580
	(202) 326-2222

## Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 120 of 172

Ш

1	405. Some Amazon employees had suggested
2	
3	
4	
5	Amazon wanted to
6	minimize any potential backlash from SFP sellers, so in 2019 Amazon let sellers already in SFP
7	remain while blocking all new enrollment. Critically, Amazon communicated to those sellers
8	who were already in SFP that it expected them to fulfill orders themselves, rather than using
9	independent fulfillment providers.
10	
11	406. Some sellers who still participate in SFP report frustrations with Amazon's
12	administration of the program, including concerns that Amazon holds SFP sellers to stricter
13	delivery benchmarks than FBA. And despite Amazon's promise that SFP products will receive
14	the Prime badge, Amazon does not consistently display the Prime badge on SFP products.
15	Amazon's search filter that allows shoppers to view only Prime-eligible products suppresses
16	Prime offers fulfilled through SFP.
17	407. Sellers continue to want Prime eligibility uncoupled from the coerced purchase of
18	FBA services.
19	
20	
21	408. Conditioning Prime eligibility on FBA usage—and thus preventing sellers from
22	using independent fulfillment providers—is not necessary to ensure Prime subscribers receive
23	quality shipping. Amazon's internal analyses showed that
24	
	COMPLAINT - 116       FEDERAL TRADE COMMISSION         CASE NO:cv       600 Pennsylvania Avenue, NW         Washington, DC 20580       (202) 326-2222

	Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 121 of 172
1	For example,
3	
4	Had Amazon genuinely cared about
5	improving shipping speeds, it would have <i>encouraged</i> SFP sellers to use independent fulfillment
6	providers instead of shuttering SFP to deliberately impede those providers' growth.
7	409. Amazon recently announced plans to reopen SFP enrollment. According to
8	Amazon, to enroll in the program, sellers would need to meet rigorous pre-qualification criteria
9	to enroll in a 30-day SFP trial, after which Amazon will determine whether they may participate
10	in SFP. Amazon's communications about upcoming changes to the SFP program continue to
11	indicate that sellers would need to fulfill Prime orders themselves, without using independent
12	fulfillment providers. As of this filing, SFP enrollment remains closed.
13	C. Amazon's Anticompetitive Tactics Work Together To Amplify Their Overall
14	Exclusionary Effect
15	410. The cumulative impact of Amazon's unlawful conduct is greater than the sum of
16	its parts.
17	411. While each anticompetitive tactic independently violates the antitrust laws, all
18	work together in mutually reinforcing ways to stifle even an equally or more efficient
19	competitor's ability to respond to any one of them. As a result, the interrelated nature of
20	Amazon's overall course of conduct amplifies the exclusionary effects of each individual aspect,
21	further entrenching Amazon's monopoly power in and across both relevant markets.
22	412. Both relevant markets exhibit network effects and scale economies that render
23	gaining scale and competitive momentum especially critical. Yet each element of Amazon's
24	course of conduct works together to artificially limit rivals' ability to grow, gather momentum,
	COMPLAINT - 117FEDERAL TRADE COMMISSIONCASE NO:cv600 Pennsylvania Avenue, NWWashington, DC 20580(202) 326-2222

and gain sufficient scale to meaningfully compete against Amazon. Consequently, in these
 relevant markets, the combined exclusionary effect of Amazon's conduct is especially pernicious
 and acute.

4 413. The various elements of Amazon's anti-discounting conduct—algorithmically
5 punishing sellers for offering lower prices elsewhere, contractually restraining ASB sellers, and
6 systematically disciplining rivals via its first-party anti-discounting algorithm—work together to
7 suppress competition in both relevant markets, thereby preventing even an equally or more
8 efficient rival from attracting a critical mass of either shoppers or sellers.

9 414. Amazon's requirement that sellers use FBA to obtain Prime eligibility for their products amplifies those effects. By further limiting sellers' alternatives to Amazon, Amazon's 10 coercive fulfillment conduct intensifies the exclusionary effect of its anti-discounting conduct. 11 In a world where rivals and potential rivals were not artificially prevented from gaining the scale 12 needed to meaningfully compete against Amazon, Amazon's seller punishments would pose less 13 of a threat to sellers' survival. But Amazon's coercive FBA conduct works in tandem with its 14 anti-discounting conduct to foreclose that world. The resulting lack of comparable alternatives 15 16 to Amazon intensifies the severity of Amazon's anti-discounting punishments, giving those 17 punishments—and even the threat of those punishments—greater force.

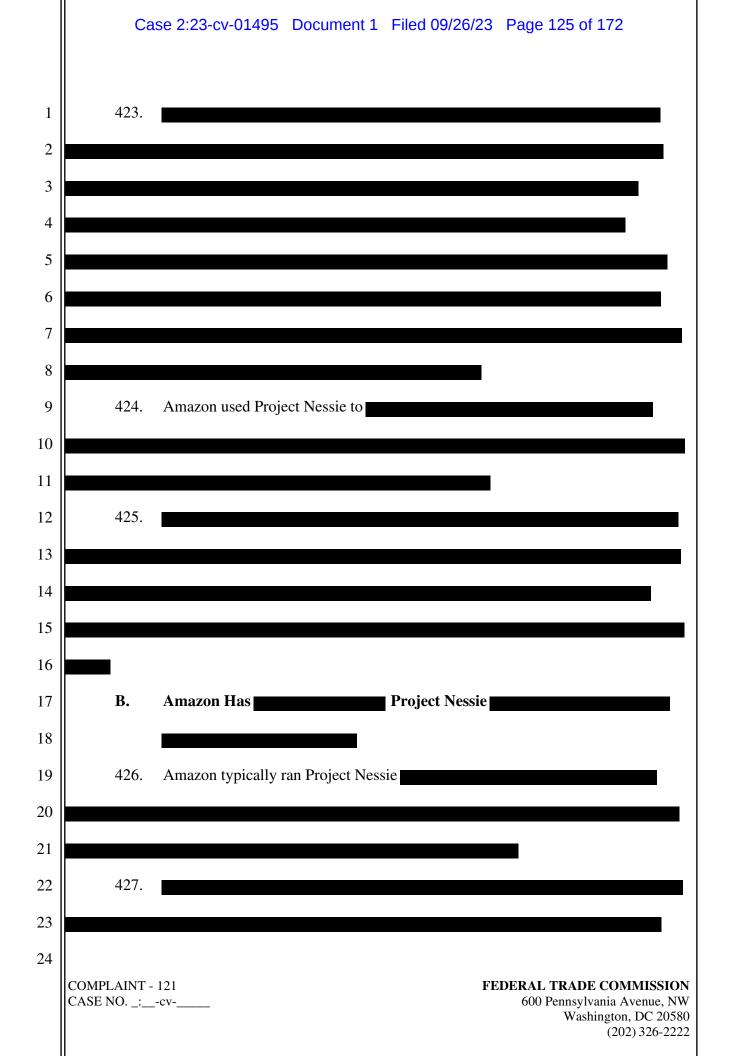

18 415. Amazon's anti-discounting conduct, in turn, amplifies the exclusionary effects of 19 tying Prime eligibility to sellers' use of FBA. Amazon's FBA conduct alone prevents sellers 20 from using alternatives to FBA to fulfill Prime-eligible orders on Amazon and lowers the 21 attractiveness of selling off Amazon because it raises sellers' costs, which are often passed on to 22 shoppers. Amazon's anti-discounting conduct further reduces the appeal of selling off Amazon 23 by threatening sellers with the risk of losing their Amazon sales if Amazon detects a lower price 24 elsewhere and suppressing the effectiveness of marketplaces' attempts to compete on price by **COMPLAINT - 118** FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_\_ 600 Pennsylvania Avenue, NW

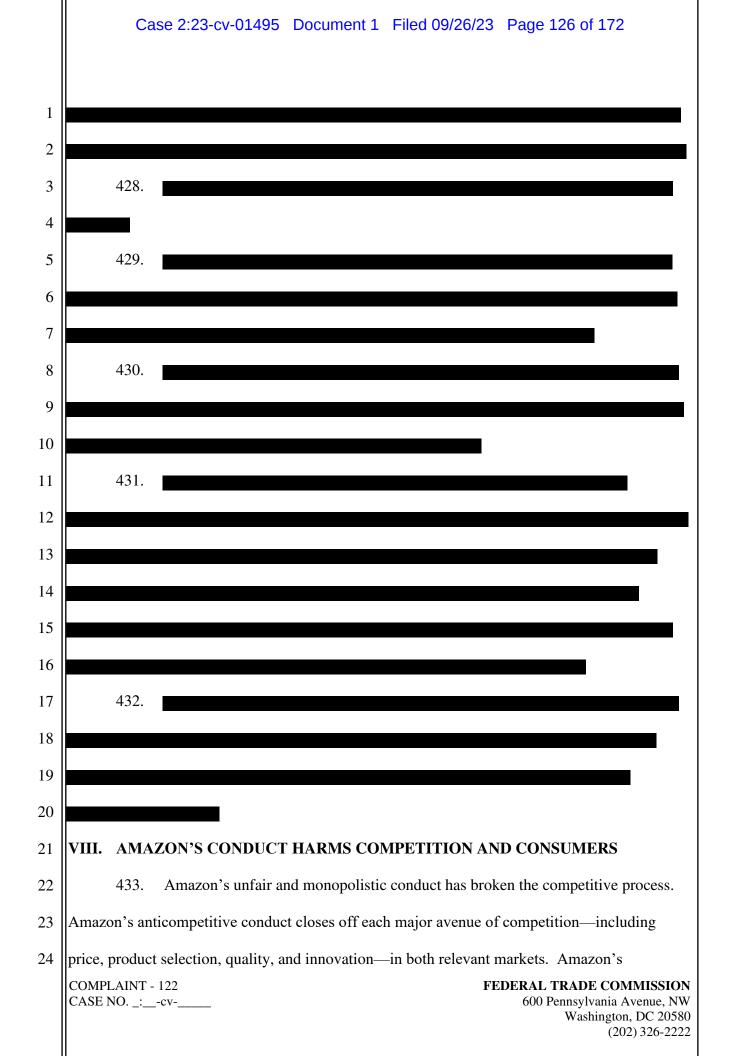

### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 123 of 172

lowering their fees to sellers. As a result, sellers are further deterred from bringing additional
 selection to rival marketplaces, prices for products on rival marketplaces are higher, and
 independent fulfillment providers are artificially stunted. Collectively, this impedes an equally
 or more efficient rival from being able to meaningfully compete with Amazon.

monopolistic conduct also harms consumers in both markets, shoppers and sellers alike, by
 depriving them of the benefits of open, fair competition and allowing Amazon to exploit its
 monopoly power without facing the competitive checks of a free enterprise system.

4 434. The presence of scale economies and network effects in both relevant markets
5 means that a firm must be able to gain scale in order to compete effectively. But Amazon has
6 artificially suppressed rivals' ability to attract business, gain momentum, and grow.

435. Amazon's conduct interrupts, impedes, and distorts the normal give-and-take of a
healthy market by blocking off every major avenue of competition—including price, product
selection, quality, and innovation—that rivals and potential rivals would ordinarily use to
compete on the merits for shoppers' and sellers' business in the relevant markets for online
superstores and online marketplace services.

436. 12 For example, Amazon's anti-discounting conduct leverages both its first-party Retail and its third-party Marketplace business units to suppress competition. Amazon's first-13 party anti-discounting algorithm disciplines rivals from undercutting Amazon's prices, and 14 15 Amazon punishes third-party sellers for offering lower prices on other platforms. Without the 16 ability to attract either shoppers or sellers through lower prices, rivals are unable to gain a critical 17 mass of customers and meaningfully compete against Amazon. At the same time, Amazon's 18 coercive fulfillment conduct both artificially stunts the growth of independent fulfillment 19 providers and artificially raises the costs that sellers face when seeking to multihome. This limits 20seller multihoming and thereby suppresses Amazon's rivals' ability to compete for sellers by 21 offering better terms and for shoppers by offering additional product selection.

437. Together, Amazon's exclusionary course of conduct works to suppress
competition in both relevant markets, foreclosing even an innovative, high-quality rival or
potential rival from competing on the merits.

COMPLAINT - 123 CASE NO. \_:\_\_-cv-\_\_\_\_

1 438. Amazon's conduct also harms consumers in both relevant markets. For example, Amazon's conduct has artificially inflated prices for both shoppers and sellers, degraded the 2 quality of online superstores for shoppers and of online marketplace services for sellers, reduced 3 output in both relevant markets, hindered shoppers from comparison-shopping for the best deals, 4 suppressed the flow of useful price and quality information to shoppers, stifled sellers' ability to 5 gain additional business by offering lower prices, restricted sellers' freedom to choose to 6 multihome across their preferred sales channels, reduced consumer choice for both shoppers and 7 8 sellers by yielding a less diverse set of competitive options, and stripped consumers in both relevant markets of the benefits of innovation. 9

439. Amazon's anticompetitive conduct is not reasonably necessary to achieve any
cognizable procompetitive benefits. The anticompetitive harm from those practices outweighs
any procompetitive benefits, and Amazon could reasonably achieve any procompetitive goals
through less restrictive alternatives.

440. Amazon's unlawful conduct has caused cumulative and compounding harm over
time. Through its years-long course of illegal conduct, Amazon has deeply entrenched its
monopolies in both relevant markets and further widened the gulf between Amazon and
everyone else. Particularly given the importance of scale economies and network effects in these
markets, Amazon's conduct has yielded a distorted and stunted competitive landscape.

441. Left unchecked, Amazon will continue to harm competition and maintain its
monopoly power over the online superstore market and the market for online marketplace
services, causing myriad and widespread harms to shoppers, sellers, and the public—and
depriving Americans of the benefits of fair and free competition.

### VIOLATIONS ALLEGED

### COUNT I

# MONOPOLY MAINTENANCE OF THE ONLINE SUPERSTORE MARKET (15 U.S.C. § 45(a))

5 442. Plaintiff FTC re-alleges and incorporates by reference the allegations in
6 paragraphs 1-441 above.

7 443. At all relevant times, Amazon has had monopoly power in the online superstore
8 market in the United States.

9 Amazon has willfully maintained its monopoly power through its course of 444. anticompetitive and exclusionary conduct, including Amazon's anti-discounting practices, which 10 11 stifle price competition and tend to create an artificial price floor, and Amazon's practice of coercing sellers who want their products to be Prime eligible into using Fulfillment by Amazon, 12 which makes it more difficult and more expensive for rivals to offer increased product selection. 13 445. Although each of these acts is anticompetitive in its own right, these interrelated 14 and independent actions have had a cumulative and synergistic effect that has harmed 15

16 competition and the competitive process.

17 446. There is no valid procompetitive justification for Amazon's anticompetitive and
18 exclusionary conduct in the online superstore market.

447. Amazon's anticompetitive and exclusionary conduct constitutes unlawful
monopoly maintenance, in violation of Section 5(a) of the FTC Act, 15 U.S.C. § 45(a), and
Section 2 of the Sherman Act, 15 U.S.C. § 2.

**COUNT II** 1 MONOPOLY MAINTENANCE OF THE 2 **ONLINE MARKETPLACE SERVICES MARKET** 3 (15 U.S.C. § 45(a)) 4 5 448. Plaintiff FTC re-alleges and incorporates by reference the allegations in paragraphs 1-447 above. 6 7 449. At all relevant times, Amazon has had monopoly power in the worldwide market 8 for online marketplace services for U.S. customers. 9 450. Amazon has willfully maintained its monopoly power through its course of anticompetitive and exclusionary conduct, including Amazon's anti-discounting practices, which 10 11 stifle price competition and tend to create an artificial price floor, and Amazon's practice of coercing sellers who want their products to be Prime eligible into using Fulfillment by Amazon, 12 which makes it more difficult and more expensive for rivals to offer increased product selection. 13 451. Although each of these acts is anticompetitive in its own right, these interrelated 14 and independent actions have had a cumulative and synergistic effect that has harmed 15 16 competition and the competitive process. 452. There is no valid procompetitive justification for Amazon's anticompetitive and 17 exclusionary conduct in the online marketplace services market. 18 19 453. Amazon's anticompetitive and exclusionary conduct constitutes unlawful 20 monopoly maintenance, in violation of Section 5(a) of the FTC Act, 15 U.S.C. § 45(a), and 21 Section 2 of the Sherman Act, 15 U.S.C. § 2. 22 23 24 COMPLAINT - 126 FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_\_\_ 600 Pennsylvania Avenue, NW Washington, DC 20580

7 monopoly maintenance, in violation of Section 2 of the Sherman Act, 15 U.S.C. § 2.

### **COUNT VII**

### VIOLATIONS OF CONNECTICUT STATE LAW

478. The State of Connecticut repeats and re-alleges and incorporates by reference
 each and every preceding paragraph and allegation of this Complaint as if fully set forth herein.
 479. Amazon's actions alleged in the Complaint violate the Connecticut Antitrust Act
 ("CAA"), General Statutes § 35-24 *et seq*.

480. Amazon's actions alleged in the Complaint constitute monopolization of a part of
trade or commerce within the state in violation of Conn. Gen. Stat. § 35-27.

481. The State of Connecticut seeks all remedies available under CAA, including,
without limitation, the following:

18 (a) Injunctive and other equitable relief, pursuant to Conn. Gen. Stat. § 35-34;

(b) Costs and attorney's fees, pursuant to Conn. Gen. Stat. § 35-34; and

(c) Other remedies as the Court may deem appropriate under the facts and circumstances of the case.

482. Amazon's actions as alleged herein also constitute unfair methods of competition
and/or unfair or deceptive acts or practices in trade or commerce in violation of the Connecticut
Unfair Trade Practices Act ("CUTPA"), Conn. Gen. Stat. § 42-110b *et seq*.

### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 139 of 172

1	504.	In the operation of its business, Amazon engaged in numerous commercial
2	practices that	violate the New Jersey Antitrust Act, including, but not limited to, N.J.S.A. 56:9-4,
3	monopolizing	, or attempting to monopolize a part of trade or commerce within the state.
4	505.	In the operation of its business, Amazon engaged in monopolization, or attempted
5	monopolizatio	on of a part of trade or commerce, in violation of Section 2 of the Sherman Act, 15
6	U.S.C. § 2.	
7	506.	Each violation of New Jersey and/or federal law by Amazon, on or after August 5,
8	2022, constitu	ites a separate unlawful practice and violation of the CFA, N.J.S.A. 56:8-2, under
9	N.J.S.A. 56:8-4(b).	
10	507.	Plaintiff State of New Jersey seeks all remedies available under the CFA, N.J.S.A.
11	56:8-1 to -227	7, including, without limitation, the following:
12		(a) Disgorgement of all profits Amazon derived as a result of the conduct alleged
13		herein, pursuant to N.J.S.A. 56:8-8;
14		(b) Injunctive and other equitable relief, pursuant to N.J.S.A. 56:8-8;
15		(c) Costs and attorney's fees, pursuant to N.J.S.A. 56:8-11 and N.J.S.A. 56:8-19;
16		and
17		(d) Other remedies as the Court may deem appropriate and the interests of justice
18		may require.
19		COUNT XIV
20		VIOLATION OF THE NEW JERSEY CFA BY DEFENDANT
21	(UN	CONSCIONABLE COMMERCIAL PRACTICES BY DEFENDANT)
22	508.	Plaintiff State of New Jersey repeats and realleges and incorporates by reference
23	each and ever	y preceding paragraph and allegation of this Complaint as if fully set forth herein.
24	509.	The CFA, N.J.S.A. 56:8-2, prohibits:
	COMPLAINT - CASE NO:	

### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 140 of 172

The act, use or employment by any person of any unconscionable commercial practice, deception, fraud, false pretense, false promise, misrepresentation, or the knowing concealment, suppression, or omission of any material fact with intent that others rely upon such concealment, suppression or omission, in connection with the sale or advertisement of any merchandise or real estate, or with the subsequent performance of such person as aforesaid, whether or not any person has in fact been misled, deceived or damaged thereby .... 510. The CFA defines "sale" as including "any sale, rental or distribution, offer for sale, rental or distribution or attempt directly or indirectly to sell, rent or distribute ....." N.J.S.A. 56:8-1(e). 511. The CFA defines "merchandise" as "any objects, wares, goods, commodities, services or anything offered, directly or indirectly to the public for sale." N.J.S.A. 56:8-1(c). 512. At all relevant times, Amazon has engaged in the advertisement, offer for sale, and sale of merchandise within the meaning of N.J.S.A. 56:8-1(c). 513. In the operation of its businesses, Amazon engaged in unconscionable commercial practices and deception, and made misrepresentations, in violation of N.J.S.A. 56:8-2, including, but not limited to, the following: (a) Raising, maintaining and stabilizing the prices of products in its online superstore market at artificially high levels; (b) Representing that it "seek[s] to be the Earth's most customer-centric company" and creating and perpetuating a reputation for having low or the lowest prices,

20 to the detriment of consumers and for reasons unrelated to cost,
21 supply, and demand; and

(c) Depriving consumers of diversity of selection and free and open markets.

514. Each unconscionable commercial practice, misrepresentation, and act of

24 deception constitutes a separate violation under the CFA, N.J.S.A. 56:8-2.

5	Act, 79 O.S. §§ 201, et seq., including, without limitation, the following:
6	(a) Injunctive and other equitable relief pursuant to 79 O.S. § 205;
7	(b) Disgorgement and restitution pursuant to 79 O.S. § 205;
8	(c) Costs and attorney's fees pursuant to 79 O.S. § 205; and
9	(d) Other remedies as the Court may deem appropriate under the facts and
10	circumstances of the case.
11	522. The acts alleged in the Complaint also constitute violations of the Oklahoma
12	Consumer Protection Act, 15 O.S. §§ 751, et seq.
13	(a) Amazon is a person within the meaning of 15 O.S. § 752;
14	(b) The acts alleged in the Complaint occurred in connection with consumer
15	transactions within the meaning of 15 O.S. § 752; and
16	(c) The acts alleged in the Complaint constitute unfair or deceptive trade
17	practices, within the meaning of 15 O.S. § 752, and were committed in
18	violation of 15 O.S. § 753.
19	523. Plaintiff State of Oklahoma seeks relief under the Oklahoma Consumer
20	Protection Act, 15 O.S. §§ 751, et seq., including, without limitation, the following:
21	(a) Injunctive and other equitable relief pursuant to 15 O.S. § 756.1;
22	(b) Disgorgement and restitution pursuant to 79 O.S. § 756.1;
23	(c) Costs and attorney's fees pursuant to 15 O.S. § 761.1; and
24

(d) Other remedies as the Court may deem appropriate under the facts and circumstances of the case.

#### **COUNT XVIII**

### VIOLATIONS OF PENNSYLVANIA STATE LAW

## A. Pennsylvania's Unfair Trade Practices And Consumer Protection Law

527. Plaintiff Commonwealth of Pennsylvania repeats and re-alleges and incorporates
by reference each and every paragraph and allegation of this Complaint as if fully set forth
herein.

528. 9 Amazon's lines of business ranging from online retail, media, cloud computing, grocery stores, advertising and logistics and operational services are offered to consumers 10 through their substantial online presence as well as physical locations in the case of grocery 11 stores. By engaging in the conduct more fully described herein with respect to these products 12 and services, Amazon is engaging in trade or commerce that has directly or indirectly harmed the 13 Commonwealth of Pennsylvania and Pennsylvania consumers within the meaning of 73 P.S. 14 15 § 201-2(3) of the Pennsylvania Unfair Trade Practices and Consumer Protection Law ("PUTPCPL"). 16

17 529. The Pennsylvania Attorney General has reason to believe that Amazon is using or
18 is about to use any method, act or practice in violation of 73 P.S. § 201-3 and it is in the public
19 interest to prevent and restrain the use of such methods, acts or practices under 73 P.S. § 201-4.

# 1. Unfair methods of competition and unfair acts or practices under PUTPCPL

530. Plaintiff Commonwealth of Pennsylvania repeats and re-alleges and incorporates
by reference each and every paragraph and allegation of the Complaint as if fully set forth
herein.

COMPLAINT - 140 CASE NO. \_:\_\_-cv-\_\_\_\_

S31. Regardless of the nature or quality of Amazon's aforementioned acts or practices
 on the competitive process or competition, Amazon's conduct has been otherwise unfair or
 unconscionable because they offend public policy as established by statutes, the common law, or
 otherwise, are immoral, unethical, oppressive, unscrupulous, or substantially injurious to the
 Commonwealth of Pennsylvania and consumers.

6 532. Amazon's unfair conduct has resulted in the Commonwealth and consumers being
7 substantially injured by paying more for products than they otherwise would have in a free and
8 open market.

Amazon's impairment of choice and the competitive process has had the 9 533. following effects: (1) competition in the online superstore market and the market for online 10 11 marketplace services has been restrained, suppressed and eliminated throughout Pennsylvania; (2) online superstore market prices and the market for online marketplace services prices have 12 been raised, maintained and stabilized at artificially-high levels throughout Pennsylvania; (3) 13 Commonwealth of Pennsylvania and consumers have been deprived of free and open markets; 14 and (4) Commonwealth of Pennsylvania and consumers have paid supra-competitive, artificially 15 16 inflated prices for online superstore products and online marketplace services.

17 534. Amazon's impairment of choice and the competitive process have caused the
18 Commonwealth of Pennsylvania and consumers to suffer and to continue to suffer loss of money
19 by means of Amazon's use or employment of unfair methods of competition and/or unfair acts or
20 practices as set forth above.

21 535. Amazon's conduct more fully described herein is unlawful pursuant to 73 P.S.
22 § 201-3.

23 536. The aforesaid methods, acts or practices constitute unfair methods of competition
 24 and/or unfair acts or practices within their meaning under Section 2(4) of the PUTPCPL,
 COMPLAINT - 141
 CASE NO. \_:\_\_-cv-\_\_\_\_
 600 Pennsylvania Avenue, NW

600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222

1	including, but not limited to, "Engaging in any other fraudulent or deceptive conduct which			
2	creates a likelihood of confusion or of misunderstanding" in violation of 73 P.S. § 201-2(4)(xxi).			
3	537. The above-described conduct created the likelihood of confusion and			
4	misunderstanding and exploited unfair advantage of the Commonwealth of Pennsylvania and			
5	consumers seeking to exercise a meaningful choice in markets expected to be free of impairment			
6	to the competitive process and thus constitutes an unfair method of competition through one or			
7	more of the following:			
8	(a) Violating Section 2 of the Sherman Act, 15 U.S.C. § 2, through willfully			
9	maintaining its monopoly power over the online superstore market as set forth			
10	in the preceding counts;			
11	(b) Violating Section 2 of the Sherman Act, 15 U.S.C. § 2, through willfully			
12	maintaining its monopoly power over the market for online marketplace			
13	services as set forth in the preceding counts;			
14	(c) Violating Section 5 of the Federal Trade Commission Act, 15 U.S.C § 45(a);			
15	(d) Violating Pennsylvania antitrust common law through willfully maintaining			
16	its monopoly power over the online superstore market;			
17	(e) Violating Pennsylvania antitrust common law through willfully maintaining			
18	its monopoly power over the market for online marketplace services; and/or			
19	(f) Engaging in any conduct which causes substantial injury to consumers.			
20	538. The above-described conduct substantially injured consumers and the			
21	Commonwealth of Pennsylvania.			
22	539. The Commonwealth seeks entry of a permanent injunction restraining Amazon's			
23	unlawful conduct and mandating corrective measures pursuant to 73 P. S. § 201-4.			
24				
	COMPLAINT - 142FEDERAL TRADE COMMISSIONCASE NO:cv600 Pennsylvania Avenue, NWWashington, DC 20580(202) 326-2222			

540. The Commonwealth also requests that the Court direct Amazon to restore to the
 Commonwealth on behalf of all victims the ill-gotten gains acquired from their inflated pricing
 during the period of time Amazon's unlawful conduct took place, pursuant to 73 P. S. § 201-4.1.

4

2.

### Deceptive acts or practices under PUTPCPL

5 541. Plaintiff Commonwealth of Pennsylvania repeats and re-alleges and incorporates
6 by reference each and every paragraph and allegation of the Complaint as if fully set forth
7 herein.

8 542. Amazon deceptively misrepresented to the Commonwealth of Pennsylvania and
9 consumers that Amazon's pricing in the online superstore market and the market for online
10 marketplace services was competitive and fair.

543. Amazon deceptively concealed from, or otherwise misled, the Commonwealth of
Pennsylvania and consumers as to the actual characteristics of the marketplace being other than
competitive and fair.

14 544. Regardless of the nature or quality of Amazon's aforementioned acts or practices
15 on the competitive process or competition, Amazon's conduct has had the tendency or capacity
16 to deceive.

545. Amazon's deceptive conduct has resulted in the Commonwealth and consumers
being substantially injured by paying more for products than they otherwise would have in a free,
open, fair, and competitive market.

600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222

### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 148 of 172

throughout Pennsylvania; (3) Commonwealth of Pennsylvania and consumers have been 1 2 deprived of free and open markets; and (4) Commonwealth of Pennsylvania and consumers have paid supra-competitive, artificially inflated prices for products in the online superstore market 3 and the market for online marketplace services. 4 5 547. Amazon's impairment of choice and the competitive process has caused the Commonwealth of Pennsylvania and consumers to suffer and to continue to suffer loss of money 6 by means of Amazon's use or employment of unfair methods of competition and/or unfair acts or 7 8 practices as set forth above. Amazon's conduct more fully described herein is unlawful pursuant to 73 P. S. 9 548. § 201-3. 10 11 549. The aforesaid methods, acts or practices constitute deceptive acts or practices within their meaning under Section 2 (4) of the PUTPCPL, including, but not limited to: 12 (a) "Representing that goods or services have sponsorship, approval, 13 characteristics, ingredients, uses, benefits or quantities that they do not have or 14 15 that a person has a sponsorship, approval, status, affiliation or connection that he does not have" in violation of 73 P.S. § 201-2(4)(v); 16 (b) "Representing that goods or services are of a particular standard, quality or 17 grade, or that goods are of a particular style or model, if they are of another" 18 19 in violation of 73 P.S. § 201-2(4)(vii); (c) "Engaging in any other fraudulent or deceptive conduct which creates a 20 likelihood of confusion or of misunderstanding" in violation of 73 P.S. § 201-21 2(4)(xxi). 22 23 550. The above-described conduct created the likelihood of confusion and 24 misunderstanding and exploited the deception and lack of disclosure as to the actual COMPLAINT - 144 FEDERAL TRADE COMMISSION CASE NO. \_:\_\_-cv-\_\_ 600 Pennsylvania Avenue, NW Washington, DC 20580 (202) 326-2222

### Case 2:23-cv-01495 Document 1 Filed 09/26/23 Page 149 of 172

characteristics of the marketplace to the Commonwealth of Pennsylvania and consumers seeking
 to exercise a meaningful choice in markets expected to be free, open, fair, and competitive and
 thus constitutes a deceptive act or practice.

4 551. The Commonwealth seeks entry of a permanent injunction restraining Amazon's
5 unlawful conduct and mandating corrective measures pursuant to 73 P. S. § 201-4.

552. The Commonwealth also requests that the Court direct Amazon to restore to the
Commonwealth on behalf of all victims the ill-gotten gains acquired from their inflated pricing
during the period of time Amazon's unlawful conduct took place, pursuant to 73 P. S. § 201-4.1.

9

**B**.

### **Common Law Doctrine Against Monopolization**

10 553. Plaintiff Commonwealth of Pennsylvania repeats and re-alleges and incorporates
11 by reference each and every paragraph and allegation of the Complaint as if fully set forth
12 herein.

13 554. The conduct to maintain Amazon's monopolies as set forth in the preceding
14 counts constitutes monopolization in violation of Pennsylvania antitrust common law.

15 555. Amazon's conduct in maintaining its monopolies had the following effects: (1) 16 competition in the online superstore market and the market for online marketplace services has 17 been restrained, suppressed and eliminated throughout Pennsylvania; (2) online superstore market prices have been raised, maintained and stabilized at artificially-high levels throughout 18 Pennsylvania; (3) Commonwealth of Pennsylvania and Pennsylvania consumers have been 19 20deprived of free and open markets; and (4) Commonwealth of Pennsylvania and Pennsylvania 21 consumers have paid supra-competitive, artificially inflated prices for online superstore products 22 and online marketplace services.

23 24 556. The Commonwealth seeks all available equitable relief under Pennsylvania common law.
